10 Meeting Leaders
13 WEDNESDAY, MARCH 22, 2017
13 SAGES Scientific Sessions
13 Military Surgical Symposium
14 Masters Series: Colorectal “The Road to Success - MIS Approaches to the Sigmoid Colon and Upper Rectum”
14 Postgraduate Course: Get Published - How to Write a Scientific Manuscript
15 Postgraduate Course: Robotic Hernia Surgery
16 Postgraduate Course: Primary Endoscopic Management of the Bariatric Patient
17 SAGES Foundation Awards Luncheon
18 Hands-On Course: Endolumenal Bariatrics
18 Hands-On Course: Robotic Inguinal Hernia Surgery
19 Masters Series: The SAGES Masters Take You to Forerun School
19 Workshop: Get Published
20 Panel: Meeting the ABS Mandate - The Program Director’s Guide to the FRC Galaxy
20 Your Session: Prevention of Bile Duct Injury
21 The Devil is in the Details Session: Ventral Hernia
22 Symposium: Coaching and Telementoring in the Global Arena
22 Opening Session - Welcome Ceremony
22 Exhibits Opening Welcome Reception
23 THURSDAY, MARCH 23, 2017
23 SAGES Scientific Sessions & Videos
23 AAST Joint Panel: Acute Care Surgery
23 KSELS Joint Panel: Gastric Cancer - Narrowing the Gap between Eastern and Western Practice in Laparoscopic Gastric Surgery
24 The Devil is in the Details Session: Technical Tips from the Masters - Bariatric Conversion
25 Video Face-Off Panel: Laparoscopic Nissen Fundoplication
25 Keynote: Karl Storz Lecture - Dave Kerpen
25 Keynote: Social Media and Health Care - Brian P. Jacob, MD
26 Postgraduate Course: ILLS Joint Session - Overview of Minimally Invasive Liver Resection
26 Postgraduate Course: SMART Enhanced Recovery - Beyond Colorectal
27 Program of the “Americas” Joint Panel: What I thought was a fact is a Myth?
28 Video Face-Off Panel: Lap Band to Gastric Bypass
29 Panel: Firsts and Pioneers - Evolutions and Revolutions in Surgery
29 Educator’s Luncheon “Can I Trust my Trainees to do it Right?” Entrustable Professional Activities (EPA’s) for Competency-Based Surgical Education
30 Free Lunch in the Exhibit Hall for All Attendees
30 Let’s Do Lunch - Hernia, Liver/Biliary, Esophagus & Colon Tables
30 Community Practice Townhall
30 Hands-On Course: Lap Colon ADOPT (Immersion Program)
31 Workshop: SMART Enhanced Recovery for the Team
32 Postgraduate Course: ILLS Joint Session - Techniques of Laparoscopic Liver Resection Video Session and Liver Tumor Board
32 SAGES/ASMB Joint Appropriateness Conference on Metabolic Surgery
33 JSES Joint Panel: MIS Trends in North America and Japan
34 Lecture: Controversies in the Management of Foregut Disease
34 Video Face-Off Panel: Minimally Invasive Inguinal Hernia Repair
34 Refreshment Break/ Happy ½ Hour in Exhibit Hall
35 Masters Series: Laparoscopy in Acute Care
35 SS: SAGES Got Talent - Resident & Fellow Scientific Session
36 Symposium: International Hernia Collaboration Symposium
37 Video Face-Off Panel: Common Bile Duct Exploration - More Than One Way to Skin a Cat
37 The Devil is in the Details Session: Technical Tips from the Masters - Laparoscopic Gastrectomy for Malignancy
37 Industry Educational Events
38 FRIDAY, MARCH 24, 2017
38 Medical Student Townhall
38 Keynote: Presidential Address - Daniel J. Scott, MD
38 Keynote: Gerald Marks Lecture - H. Jaap Bonjer, MD
38 SAGES Scientific Sessions & Videos
39 Your Session: Management of Complications of Bariatric Surgery
39 Refreshment Break/Morning Mimosas in Exhibit Hall
39 Panel: Finishing Residency; I’m Done! Now What?
40 The Devil is in the Details Session: Laparoscopic Hartman’s Reversal and Laparoscopic Lavage
40 The Devil is in the Details Session: Treatment of Recurrent Achalasia
41 Your Session: Abdominal Wall Hernia
41 FC Luncheon “Ensuring Competency Through Fellowship Training: Frameworks for Success”
42 Free Lunch in the Exhibit Hall for All Attendees
42 Let’s Do Lunch - Gastric, Pancreas, Gallbladder/ERCP & Rectal Tables
42 Masters Series: Surgical Coaching - Tips to Enhance Skills of Trainees and Peers
42 AHPBA Joint Panel: Contemporary Themes in Minimally Invasive Pancreatic Surgery
43 Panel: Endoscopic and Laparoscopic Enteral Access - How to Do it and How to Treat Complications
43 Panel: Global Surgery
44 Video Face-Off Panel: Lap Right Colon
45 ASCRS Joint Panel: Laparoscopy for IBD
45 EAES Joint Panel: Cutting Edge Minimally Invasive Surgeon in Europe
45 SSAT Joint Panel: Incidental GI Findings during Surgery
46 The Devil is in the Details Session: Re-Do Anti-Reflux Surgery
46 Video Face-Off Panel: Distal Pancreatectomy
47 Your session: GERD and Achalasia
47 Panel: Robotic Surgery - New Platforms and Strategies to Overcome the Learning Curve
48 SSAT Joint Panel: Incidental GI Findings during Surgery
48 Candidate Networking Townhall
48 Meet the Leadership Reception for Residents, Fellows, & New Members
48 Main Event & International Sing-Off @ Space Center Houston
50 SATURDAY, MARCH 25, 2017
50 SAGES Scientific Sessions
50 Postgraduate Course: Fundamental Use of Surgical Energy
50 AGA Joint Session: Shark Tank (non-CME)
51 Session: Wild Cases presented in the Wild West
51 Panel: Managing Adults with Congenital Surgical Anomalies
52 Session: Emerging Technology (non-CME)
52 AGSE Joint Panel: Endoscopic Management of Colon Lesions
53 Panel: Complications - Ooops! When Things Go Wrong
53 Masters Series: AHS Joint Session - Ventral Hernia

@SAGES_Updates  www.facebook.com/SAGESSurgery
Dear Colleagues:

On behalf of SAGES President, Dr. Daniel J. Scott, and the Program Committee, we would like to invite you to attend the 2017 SAGES Annual Meeting in Houston, TX, the fourth-largest city in the United States, also known as “Space City”, “The Energy Capital of the World”, and importantly, the site of the largest medical center in the world, the “Texas Medical Center”.

This year’s SAGES Meeting will be held at the George R. Brown Convention Center from March 22-25. The meeting is designed to encourage communication and collaboration and to make room for the voices of SAGES members and meeting attendees at large. We invite all of you to come to the meeting to exchange with colleagues, learn from your peers and take home a few pearls that will improve how you care for your surgical patients. Most importantly, we hope that you have FUN, because, in addition to the high quality science, innovative technology and world-renowned expertise, we really know how to have a good time!!

The most popular topics that will be highlighted at the meeting are foregut, colorectal, hernia, bariatric, minimally invasive liver and pancreas surgery as well as flexible endoscopy. Highlights include: Postgraduate (PG) courses, including: How to write and get your Scientific Manuscript Published, Robotic Hernia Surgery, Minimally Invasive Liver Surgery, a FUSE course, and SMART Beyond Colorectal with a SMART workshop designed for the entire surgical team. The hands-on courses include Endolumenal Bariatrics, Robotic Hernia Surgery, and the innovative ADOPT Colon course.

Back this year is the SAGES Masters Series, in-depth presentations offered by master surgeons, detailing techniques that will help surgeons take their practice to the next level.

**New things to look out for are:** “Your Sessions” which will showcase lecture topics selected by the membership at large and will include presentations on issues that are relevant to you and your current practice. “Video Face-Off” sessions will be reviewing pre-recorded videos where surgeons explain what they are doing and why. The “Devil is in the Details” are additional video sessions that will review common advanced procedures in depth so that you can really learn tips and tricks from experts. “Let’s do Lunch” will offer opportunity to have lunch with your peers and find out in an open discussion, what they are doing in your area of interest.

Multiple sessions in collaboration with several local and international surgical societies will enhance the 2017 meeting by bringing together expertise from SAGES and each of these societies and discuss subjects that are of common interest to SAGES members.

As with all SAGES technology-friendly meetings, the conference features electronic media to allow you to personalize your experience. A SAGES Meeting App will provide access to meeting content via your handheld devices, and e-mails and tweets during the meeting will keep attendees informed. Of course, no SAGES meeting would be complete without the Friday night Main Event and Sing-off.

If you go to just one surgical meeting in 2017, this is the one! We look forward to seeing you in Houston this March.

Horacio J. Asbun, MD  
Program Chair  

Melina C. Vassiliou, MD  
Program Co-Chair  

Daniel J. Scott, MD  
SAGES President
General Information

Surgical Spring Week
Location
George R. Brown Convention Center - 3rd Level
1001 Avenida De Las Americas, Houston, TX 77010

Hosted By
Society of American Gastrointestinal and Endoscopic Surgeons (SAGES)
11300 W. Olympic Blvd., Suite 600
Los Angeles, CA 90064
Phone: 310-437-0544
Fax: 310-437-0585
Email: sagesweb@sages.org
Web: www.sages.org
Twitter: @SAGES_Updates

Registration
11300 W. Olympic Blvd., Suite 600
Los Angeles, CA 90064
Phone: 310-437-0544, ext. 128
Fax: 310-437-0585
Email: registration@sages.org

How do I register?
Register on-line!
www.sages.org/registration/

Save by registering prior to the early bird deadline of January 30, 2017.
Complete the registration form online or on pages 73-74.

Who Should Attend:
The SAGES Annual Meeting has elements that have been specifically designed to meet the needs of practicing surgeons, surgeons-in-training, GI assistants, nurses and other allied health professionals who are interested in minimally invasive surgery and gastrointestinal endoscopy. Thorough coverage of traditional topics and presentations of "cutting edge" material can be found in this program. The SAGES Program Committee recommends that participants design their own attendance schedule based on their own personal educational objectives.

Exhibit Only Registration
For those participants only interested in attending the technical exhibits, we will offer a special Exhibits Only Pass. This option will only be available on-site. You may register for an Exhibits Only Pass beginning the morning of Wednesday, March 22, 2017.
For additional information, please contact the Registrar (310) 437-0544 ext. 128.

SAGEx Registration Hours
Tuesday, March 21, 2017 12:00 PM - 5:00 PM
Wednesday, March 22, 2017 6:30 AM - 6:30 PM
Thursday, March 23, 2017 6:30 AM - 5:30 PM
Friday, March 24, 2017 6:30 AM - 5:30 PM
Saturday, March 25, 2017 7:00 AM - 2:00 PM

Exhibits Dates & Hours -
Wednesday, March 22 Opening Reception: 5:30 pm - 7:30 pm
Thursday, March 23 10:00 am - 4:00 pm
Friday, March 24 10:00 am - 4:00 pm
Saturday, March 25 CLOSED
Exhibits Location: George R. Brown Convention Center - 3rd Level – Exhibit Hall A3.

The SAGES Meeting has different registration options & pricing. See pages 73 - 74 for details.
Try the SuperPass for best value!
Register on-line at www.sages.org by the January 30, 2017 early deadline!

What Is The Military Surgical Symposium?
The Military Surgical Symposium will meet again concurrent to SAGES in Houston. The military symposium will include all the military services (note this is not an official Department of Defense event) and will be part of the scientific and clinical sessions of the annual SAGES conference. Registration for both the SAGES conference and military symposium will be free to military personnel currently on active duty. Contact the registrar for the registration form.
See page 13 for their program outline.

VISA Information for International Attendees
For more than 50 years, the United States of America has required visas to be issued to those wishing to study, visit, or conduct business in the U.S. While changes have been made recently to U.S. visa law, many procedures remain the same. Most importantly, you must APPLY EARLY for a visa, as processing time has increased in some instances. For information about obtaining a visa, please visit the following website: http://www.unitedstatesvisas.gov
If you need a written invitation to assist you with your visa, please email the SAGES Registrar, registration@sages.org, with your name, title, institution, and complete physical mailing address for each request.

Airport/Travel Information:
The George R. Brown Convention Center and surrounding hotels are located in downtown Houston, approximately 21 miles/30 minutes from George Bush International Airport (IAH) and 11 miles/20 minutes from the William P. Hobby Airport (HOU).
For transportation options visit https://www.visithoustontexas.com/travel-planning/maps-and-transportation/houston-airports/
SAGES

Humanity, Education, Leadership, Perspective, Support

Again this year SAGES will be involved in several projects to support the community in which we host our annual meeting. This is an extraordinary way for registrants and guests to help repair the world one tiny step at a time.

This year’s initiatives:

| Spouse Breakfast in Memory of Barbara Marks | This year we are going to do two things Barbara would love: |
| Thursday Morning, March 23 | 1. The SAGES spouses will gather to break bread together and just enjoy each other’s company. |
| Cost: No Fee - All spouses/guests are welcomed to attend. Included with Guest registration. | 2. After breakfast we will work with the SAGES Humanitarian Committee to assemble wish list packages for local non-profits. |

Mini-Med School Boot Camp

High school students from the Houston area and SAGES membership will have the opportunity to experience the wonderful world of medicine and minimally invasive surgery. The day is power packed with classroom lectures, and Interactive Stations Experience. Both cognitive and skill competitions with awards and prizes will be offered. See page 55 for further details.

Saturday, March 25: 8:00AM - 2:00PM

Limitation: Must be a High School Student

Lunch Provided

Cost: No fee

SAGES Recognition of Excellence Award

Log onto SAGESPAGES to learn To Whom, From Whom and Why. SAGES will announce recipients of the 2017 SAGES Recognition of Excellence Coin daily.

www.sages.org/sagespages

SAGES Accreditation

The Society of American Gastrointestinal and Endoscopic Surgeons (SAGES) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to sponsor Continuing Medical Education for physicians.

The Society of American Gastrointestinal and Endoscopic Surgeons (SAGES) designates this live activity for a maximum of 35.5 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Self-Assessment CME Credit, Part 2 of the American Board of Surgery (ABS) Maintenance of Certification (MOC) Program

The entire 2017 meeting has been designated for Self-Assessment CME Credit, applicable to Part 2 of the American Board of Surgery (ABS) Maintenance of Certification (MOC) Program. In order to claim Self-Assessment credit, attendees must participate in a post meeting quiz. For additional information on the ABS MOC program and its requirements, visit the ABS website at: http://home.absurgery.org/default.jsp?exam-moc

Thanks to our 2016 Meeting Supporters:

Diamond
Stryker Endoscopy

Platinum
Intuitive Surgical • Karl Storz Endoscopy • Medtronic
Olympus Corporation of the Americas

Gold
Ethicon

Silver
Boston Scientific • Gore & Associates • Mederi Therapeutics • Teleflex
SAGES will be using a cell-phone based system to handle Audience Response, Questions From the Floor, and General Meeting Announcements. If you wish to participate, please be sure to have in Houston a cell phone capable of sending SMS text messages in the USA.

Please contact webmaster@sages.org if you have questions or need advice.

Check the SAGES website and 2017 Meeting App frequently for SAGES Foundation and/or Industry events (not planned nor accredited for CME by SAGES) which may have been added after this program was published.

New for SAGES 2017

Each session has been assigned a relevant Learning Theme(s) and appropriate Guideline(s) will be referenced.

Look for more information in Final Program and/or the SAGES 2017 Meeting App.

Unique features that make SAGES 2017 THE meeting to attend!

» Houston, TX – the fourth-largest city in the United States, also known as “Space City”; plan an exciting Spring getaway for your whole family.

» **ALL NEW!** The “Your Sessions” showcase lecture titles selected by you, the membership at large, and will include presentations on issues that are relevant to you and your daily practice.

» **ALL NEW!** The “SAGES Video Face-Off” featuring pre-recorded video sessions from experts showing differences in how they perform procedures. The experts will be on the panel.

» **ALL NEW!** The “Devil is in the Details” sessions are an in-depth look at various common procedures with surgical tips and tricks by experts.

» **ALL NEW!** "Let's do Lunch" no need for a professor at lunch! For a small fee you will have lunch with your peers and find out in an open discussion, what they're doing in your areas of interest. Each table will be divided by subject matter for a conversation among during lunch.

» Immerse yourself in one of our comprehensive postgraduate courses.

» **IT’S BACK!** The SAGES Masters Series in-depth presentations grouped by topic that are offered by master surgeons, provide techniques and tips that you can use immediately to take your practice to the next level.

» Learn the essentials of minimally invasive and open general surgery including updates and controversies in foregut, colorectal, hernia, bariatric and oncologic surgery as well as flexible endoscopy.

» Enjoy a day-long program with our Joint Armed Forces colleagues, and collaborative joint sessions with our friends and colleagues from the AAST, AHPBA, ASCRS, ASE, ASGE, ASMB, SSAT, EAES (Europe), JSES (Japan), KSELS (Korea), and across The Americas.

» The Friday-night Gala and Sing-Off is sure to be a highlight of your trip to Houston.

» Download the apps – iOS and Android apps streamline your meeting experience.

» Get your SAGES gear at our onsite store.

**SAGES 2017 - “SAGES is Home: Collaborate, Communicate, Connect” – Don’t miss it!**

Save the Date!

- **SAGES/CAGS hosted World Congress of Endoscopic Surgery**
  
  April 11 - 14, 2018, Seattle WA

- **SAGES Scientific Session & Postgraduate Course**
  
  April 3 - 6, 2019, Baltimore MD
### SAGES 2017 Schedule at a Glance (as of Nov. 2016)

**Program Chairs: Horacio J. Asbun, MD & Melina C. Vassiliou, MD**

Oral & Video Sessions will take place throughout the SAGES Scientific Session.

What’s New in the Exhibit Hall?

This year’s exhibit hall offers many great attractions.

Come see the newest products and technologies and find the gems among the exhibits.

- Exhibit hall hours designed to accommodate your meeting schedule.
- **NEW!** Enjoy Friday morning Mimosas: after the Presidential Address and Keynote Lecture – enjoy a mimosa with the exhibitors!
- The exhibit hall video theater has been expanded – more videos, more seats!
- **SAGES Happy Half Hour is back on Thursday.** Join your colleagues to tour the exhibits and enjoy a snack or a beer while taking a break from the sessions.

---

**FES, FLS, and FUSE Testing Available!**

*Wednesday, March 22 - Saturday, March 25, 2017*

For more details or to schedule your test:

- Fundamental Use of Surgical Energy™ – [www.fuseprogram.org](http://www.fuseprogram.org)

SAGES University Masters Series
Chair: Daniel Bougere Jones, MD
Co-Chair: James R. Kerndorffer, MD
Co-Chair: Justin B. Dimick, MD, MPH

Postgraduate Course: ILLS Joint Session – Overview of Minimally Invasive Liver Resection
Chair: Daniel Cherqui, MD
Co-Chair: Go Wakabayashi, MD, PhD

Postgraduate Course: ILLS Joint Session – Techniques of Laparoscopic Liver Resection Video Session and Liver Tumor Board
Chair: David Geller, MD
Co-Chair: Claudius Conrad, MD, PhD

Postgraduate Course: Primary Endoscopic Management of the Bariatric Patient
Chair: Matthew D. Kno, MD
Co-Chair: Yair I. Sabah, MD

Postgraduate Course: Robotic Hernia Surgery
Chair: Ajita Satish Prabhu, MD
Co-Chair: Andrew Tyler Bates, MD

Postgraduate Course: SMART Enhanced Recovery - Beyond Colorectal
Chair: Thomas A. Aloia, MD
Co-Chair: Bruce J. Ramshaw, MD

Hands-On Course: Lap Colon ADOPT (Immersion Program with Mentorship)
Chair: Jaime E. Sanchez, MD
Co-Chair: Peter W. Marcello, MD

Hands-On Course: Endolumenal Bariatrics – Endo to the Rescue!
Chair: Kevin M. Reavis, MD
Co-Chair: Erik B. Wilson, MD

Hands-On Course: Robotic Inguinal Hernia Surgery
Chair: Ajita Satish Prabhu, MD
Co-Chair: Andrew Tyler Bates, MD

Workshop: Get Published – How to Write a Scientific Manuscript
Chair: Abe L. Fingerhut, MD
Co-Chair: Mark A. Talamini, MD

Workshop: SMART Enhanced Recovery for the Team
Chair: Liane S. Feldman, MD
Co-Chair: Pascal R. Fuchshuber, MD

Educator’s Luncheon
Chair: E. Matthew Ritter, MD

Fellowship Council Luncheon
Chair: Raul J. Rosenthal, MD

Let’s Do Lunch Tables (non-CME)
Chair: John Andrew Stauffer, MD

SAGES Program Committee

SAGES 2017 Meeting Leaders

SAGES Panel/Session/Symposium/Debate Chairs:

AAST Joint Panel: Acute Care Surgery  
Chair: Robert B. Lim, MD  
Co-Chair: Kimberly A. Davis, MD, MBA

AHPBA Joint Panel: Contemporary Themes in Minimally Invasive Pancreatic Surgery  
Chair: Charles M. Vollmer, MD  
Co-Chair: Karen D. Horvath, MD

ASCRS Joint Panel: Laparoscopy for IBD  
Chair: Hermann Kessler, MD, PhD  
Co-Chair: Tonia M. Young-Fadok, MD

ASE Joint Panel: Tools for the Surgical Educator  
Chair: John T. Faige, MD  
Co-Chair: Kent R. Van Sickle, MD

ASGE Joint Panel: Endoscopic Management of Colon Lesions  
Chair: Daniel von Renteln, MD  
Co-Chair: Michael B. Wallace, MD

SAGES/ASMBS Joint Appropriateness Conference on Bariatric Surgery  
Chair: Steven D. Schwaitzberg, MD  
Co-Chair: Brian J. Dunkin, MD

ASE Joint Panel: Endoscopic Management of Colon Lesions  
Chair: Daniel von Renteln, MD  
Co-Chair: Michael B. Wallace, MD

SAGES/ASMBS Joint Appropriateness Conference on Metabolic Surgery  
Chair: Daniel Bougere Jones, MD  
Co-Chair: Dana Alexa Telem, MD

EAES Joint Panel: Cutting Edge Minimally Invasive Surgeon in Europe  
Chair: H. Jaap Bonjer, MD, PhD  
Co-Chair: Silvana Perretta, MD

JSES Joint Panel: What Can We Learn from Each Other? MIS Trends in North America and Japan  
Chair: Manabu Yamamoto, MD  
Co-Chair: Dimitrios Stefanidis, MD, PhD

KSELS Joint Panel: Gastric Cancer  
Chair: Ho-Seong Han, MD, PhD  
Co-Chair: Barry A. Salky, MD

Lecture: Controversies in the Management of Foregut Disease  
Chair: Brian J. Dunkin, MD  
Co-Chair: Steven D. Schwartzberg, MD

Masters Series: AHS Joint Session - Hernia `It's not just Hernia`  
Chair: Archana Ramaswamy, MD  
Co-Chair: Dennis R. Klassen, MD

Masters Series: Colorctal  
Chair: John H. Marks, MD  
Co-Chair: Mark H. Whiteford, MD

Masters Series: Laparoscopy in Acute Care  
Chair: Michael William Cripps, MD  
Co-Chair: Carla M Pugh, MD, PhD

Masters Series: The SAGES Masters take You to Foregut School  
Chair: Brant K. Oelschlager, MD  
Co-Chair: Jon C. Gould, MD

Masters Series: Surgical Coaching - Tips to Enhance Skills of Trainees and Peers  
Chair: Justin B. Dimick, MD, MPH  
Co-Chairs: Aimre K Gardner, PhD; Neal E. Seymour, MD

Panel: All grown up! Managing Adults with Congenital Surgical Anomalies  
Chair: Danielle S Walsh, MD  
Co-Chair: Gretchen Purell Jackson, MD, PhD

Panel: Complications - Oops! When Things Go Wrong, What do I do now?  
Chair: John A. Hagen, MD  
Co-Chair: Amy Neville, MD

Panel: Endoscopic and Laparoscopic Enteral Access - How to do it and How to Treat Complications  
Chair: Jeffrey M. Marks, MD  
Co-Chair: John D. Mellinger, MD

Panel: Finishing Residency: I'm Done! Now What? - Transitioning to Practice  
Chair: David R. Urbach, MD  
Co-Chair: David B. Renton, MD

Panel: Firsts and Pioneers - Evolutions and Revolutions in Surgery  
Chair: Steve Eubanks, MD  
Co-Chair: Sharon L. Bachman, MD

Panel: Global Surgery - I want to do it! Where do I start? What do I need?  
Chair: Adrian Park, MD  
Co-Chair: Raymond R. Price, MD

Panel: Meeting the ABE Mandate - The Program Director's Guide to the FES Galaxy  
Chair: Thaddeus L. Trus, MD  
Co-Chair: Eric M Pauli, MD

Panel: Robotic Surgery - New Platforms and Strategies to Overcome the Learning Curve  
Chair: Omar Yusef Kasidi, MD, MBA  
Co-Chair: Melissa Ellen Hogg, MD

Program of the “Americas” Joint Panel: What I thought was a Fact is a Myth?  
Chair: Natan Zundel, MD  
Co-Chairs: Antonio Bispo, MD; Samuel Shuchleib, MD

SSAT Joint Panel: Incidental GI Findings during Surgery  
Chair: Nathaniel J. Soper, MD  
Co-Chair: Kinga A. Powers, MD, PhD

SAGES Got Talent - Resident & Fellow Scientific Session  
Chair: Philip H Pucher, MD, PhD  
Co-Chair: Kyle Lee Kleppe, MD

AGA Joint Session: Shark Tank (non-CME)  
Chair: Michael L. Kochman, MD  
Co-Chair: Jeffrey M. Marks, MD

Session: Emerging Technology (non-CME)  
Chair: Kevin E. Wasco, MD  
Co-Chair: Ozan Adrian de Oliveira Meireles, MD

AGA Joint Session: Shark Tank (non-CME)  
Chair: Michael L. Kochman, MD  
Co-Chair: Jeffrey M. Marks, MD

Session: Wild Cases presented in the Wild West  
Chair: Christopher M. Schlachta, MD  
Co-Chair: Ross F Goldberg, MD

Symposium: Coaching and Telementoring in the Global Arena - Project 6  
Chair: Allan E. Okraimper, MD  
Co-Chair: David Cha-Chang Chen, MD

Symposium: International Hernia Collaboration  
Chair: Igor Belyansky, MD  
Co-Chair: Conrad Dizon Ballecer, MD

The Devil is in the Details Session: Technical Tips from the Masters - Laparoscopic Hartman's Reversal and Laparoscopic Lavage  
Chair: Peter W. Marcello, MD  
Co-Chair: Steven D. Wexner, MD

The Devil is in the Details Session: Technical Tips from the Masters - Treatment of Recurrent Achalasia  
Chair: C. Daniel Smith, MD  
Co-Chair: Steven P. Bowers, MD

The Devil is in the Details Session: Technical Tips from the Masters - Re-Do Anti-Reflux Surgery  
Chair: David W. Rattner, MD  
Co-Chair: Edward H. Phillips, MD

The Devil is in the Details Session: Technical Tips from the Masters - Ventral Hernia  
Chair: Brent D. Matthews, MD  
Co-Chair: Andrew J. Duffy, MD

Video Face-Off Panel: Lap Band to Gastric Bypass  
Chair: Afons Pom, MD  
Co-Chair: Aurora Dawn Pryor, MD

Video Face-Off Panel: Common Bile Duct Exploration - More than one way to Skin a Cat  
Chair: Jeffrey W. Kazey, MD  
Co-Chair: Jeffrey L. Ponsky, MD

Video Face-Off Panel: Distal Pancreatectomy  
Chair: Paul Daniel Hansen, MD  
Co-Chair: Michael L. Kendrick, MD

Video Face-Off Panel: Minimally Invasive Inguinal Hernia Repair  
Chair: Shirin Towfigh, MD  
Co-Chair: Edward L. Felix, MD

Video Face-Off Panel: Lap Right Colon  
Chair: Patricia Sylva, MD  
Co-Chair: Dorin Tona Colbaseanu, MD

Video Face-Off Panel: Laparoscopic Nissen Fundoplication  
Chair: Ozan Adrian de Oliveira Meireles, MD  
Co-Chair: Kyle A. Perry, MD

Your Session: Abdominal Wall Hernia - Provocative Questions in the Practice of Hernia Repair  
Chair: Gna L. Ardales, MD, MPH  
Co-Chair: Guy R. Voeller, MD

Your Session: Challenges in the Diagnosis and Management of GERD and Achalasia  
Chair: Andrew S. Wright, MD  
Co-Chair: Simon Bergman, MD

Your Session: Management of Complications of Bariatric Surgery  
Chair: Raul J. Rosenthal, MD  
Co-Chair: Ninh Tuan Nguyen, MD

Your Session: Prevention of Bile Duct Injury  
Chair: L. Michael Brunt, MD  
Co-Chair: Rajesh Aggarwal MBBS, MA, PhD

Mini Medical School Boot Camp for HS Students (non-CME)  
Chair: James C. Rosser Jr, MD  
Co-Chair: Vadim Sherman, MD

SAGES Scientific Sessions & Videos
Accepted Oral & Video Presentations

Military Surgical Symposium
Chair: Gordon Wisbach, MD | Co-Chair: Yong Choi, MD

SESSION DESCRIPTION
The fourth annual military symposium will showcase the premier research conducted by surgical trainees in the United States Army, Navy, and Air Force. This complete Tri-service program will include a keynote lecture by a senior active duty executive officer as well as national leaders in advancing surgical quality initiatives. Participants will have a unique opportunity to ask high-ranking leaders timely questions regarding career mentoring, in garrison practice and the future of military surgery in combat.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Optimally manage their clinical, academic, and surgical skills
• Apply state-of-the-art technology and surgical technique to military surgical care
• Collaborate with surgeons of all levels of training in the military surgical community
• Integrate quality surgical initiatives to improve patient safety and surgical outcomes

**SAGES University Masters Series: Colorectal**

“The Road to Success - MIS approaches to the Sigmoid Colon and Upper Rectum”

Chair: John Marks, MD | Co-Chair: Mark Whiteford, MD

---

**SESSION DESCRIPTION**

Over 250,000 colorectal resections are performed in the USA annually. Less than 50%, however, are being done using a minimally invasive approach. This session will focus on the indications for and strategies to successfully perform laparoscopic left colectomy and LAR.

**SESSION OBJECTIVES**

At the conclusion of this session, participants will be able to:

- Identify problem areas in performing laparoscopic take down of the splenic flexure and learn different techniques to approach a difficult flexure
- Formulate a minimally invasive operative plan for the treatment of diverticulitis
- Develop a reproducible operative approach for a laparoscopic and/or robotic left colectomy and pTME resection

**Postgraduate Course: Get Published - How to Write a Scientific Manuscript**

Chair: Mark Talamini, MD | Co-Chair: Abe Fingerhut, MD

**SESSION DESCRIPTION**

Publish or perish!! Credit for advances in surgery are marked by successful publication in peer reviewed journals, and are the single most important element of surgical career development.

**SESSION OBJECTIVES**

At the conclusion of this session, participants will be able to:

- Articulate the types of manuscripts and the components of a scientific manuscript
- Construct a surgical scientific manuscript, prepare it for publication, and improve it’s likelihood of acceptance through critical appraisal and editing
- Manage and navigate the peer review process

Postgraduate Course: Robotic Hernia Surgery - What Can Robotics Add to my Hernia Armamentarium?
Chair: Ajita Prabhu, MD | Co-Chair: Andrew Bates, MD

SESSION DESCRIPTION
The diversity of hernia repair techniques has greatly increased over the past 10 years, granting surgeons a multitude of therapeutic options. Robotic hernia surgery offers an additional option that can provide patients with a minimally-invasive procedure when laparoscopic surgery may be too technically challenging. Concerns persist, however, over the costs of robotic surgery and the training required.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Recognize the appropriate role and applications for robotic surgery in hernia repair
• Appraise the economic and clinical value of robotic hernia repair
• Establish prospective clinical monitoring of robotic hernia surgery outcomes in their institutions
• Identify basic clinical anatomy and surgical technique for the repair of inguinal and ventral hernias using robotic technology

The entire 2017 meeting has been designated for Self-Assessment CME Credit, applicable to Part 2 of the American Board of Surgery (ABS) Maintenance of Certification (MOC) Program. In order to claim Self-Assessment credit, attendees must participate in a post meeting quiz.
Postgraduate Course: Primary Endoscopic Management of the Bariatric Patient
Chair: Matthew Kroh, MD | Co-Chair: Salman Al-Sabah, MD

SESSION DESCRIPTION
The obesity epidemic continues and despite the success of bariatric surgery, many patients with significant disease are not receiving or are not eligible for existing therapies. Endoluminal treatments for obesity and weight-related conditions provide additional non-surgical options for patients. Rapid development and recent approvals are giving patients access to new treatments. This session will examine the currently available endoluminal therapies approved to treat obesity and weight-related disease as well as introduce some novel and evolving technologies. Emphasis will be on patient eligibility and selection, technique of procedure, and existing data to help guide endoscopists and surgeons.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Distinguish different endoluminal targets and mechanism of action of procedures for primary treatment of obesity
• Identify which patients who are eligible for different endoluminal therapies, including selection based on BMI, weight-related co-morbid disease, and existing anatomy
• Assess data and demonstrate practice paradigms of how endoluminal therapies fit within the context of a comprehensive bariatric program

The 11th Annual SAGES Foundation Awards Luncheon

SAGES does not offer CME for this session

This annual ticketed event celebrates and honors distinguished leaders in minimally invasive surgery. Proceeds benefit the SAGES Foundation and its mission to advance endoscopic, laparoscopic, and emerging minimal access surgical methods and patient care. The 2017 Awards Luncheon features awards and research grants presented to outstanding surgeons and educators for their work in minimally invasive surgery and raises funds to keep patient safety and surgical innovation in the forefront.

THE FOLLOWING AWARDS WILL BE PRESENTED:

- SAGES Career Development Award & Research Grant Awards
- SAGES Young Researcher Award
- SAGES Researcher in Training Award
- SAGES IRCAD Traveling Fellowship Award
  SAGES acknowledges a generous grant in support of this award from Karl Storz Endoscopy
- SAGES Brandeis Awards (2 recipients)
  SAGES acknowledges a generous grant in support of one award from the SAGES Foundation
- SAGES Advocacy Summit Award
- SAGES Foundation Margrét Oddsdóttir Traveling Fellowship Award
- SAGES Foundation Gerald Marks Rectal Cancer Award
- SAGES Foundation Excellence in Medical Leadership Award
  Generously funded through an unrestricted educational grant from W.L. Gore & Associates
- SAGES Foundation Jeffrey L. Ponsky Master Educator in Endoscopy Award
- Arnold P. Gold Foundation Excellence in Humanistic Clinical Care Award
  SAGES acknowledges a generous grant in support of this award from the Arnold P. Gold Foundation
- SAGES International Ambassador Award
- SAGES Pioneer in Surgical Endoscopy Award
- SAGES Distinguished Service Award
- SAGES Berci Lifetime Achievement Award

How to RSVP: To become an event sponsor, purchase individual tickets, tables, or virtual ads, please contact the Foundation office at (310) 347-0544 or foundation@sages.org. Individual tickets $175 each and tables of ten are available for $1,300. Since this event benefits the SAGES Foundation, a portion of your purchase is tax-deductible to the extent permitted by law. Note: After March 8, 2017 a late registration fee will apply as follows: individual tickets will be $195 and tables of ten will be $1,325. On-site registration for individual tickets will be $225 and for tables of ten will be $1,375.

1:30 PM - 5:00 PM

Hands-On Course: Endolumenal Bariatrics - Endo to the Rescue!
Chair: Kevin Reavis, MD | Co-Chair: Erik Wilson, MD

SESSION DESCRIPTION
The global obesity epidemic is worsening. Endolumenal technologies are emerging as both index treatments for morbid obesity as well as assessment and revisional modalities to address complications of previous bariatric surgeries. Familiarity with these technologies is imperative for surgeons who wish to provide the latest in minimally invasive care for these challenging patients.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Recognize the characteristics of an appropriate candidate for endolumenal index treatment of obesity
• Manage a hemorrhage/perforation scenario using endoscopic modalities
• Implement an endolumenal treatment plan for chronic leak following bariatric surgery

COURSE CRITERIA
Participants should have at least baseline experience with diagnostic upper endoscopy.

Hands-On Course: Robotic Inguinal Hernia Surgery
Chair: Ajita Prabhu, MD | Co-Chair: Andrew Bates, MD

SESSION DESCRIPTION
Robotic inguinal hernia surgery has quickly gained popularity among general surgeons. This hands-on course is an opportunity for surgeons to gain an introductory experience performing robotic inguinal hernia surgery under the guidance of experienced proctors. Participants will NOT receive certification to perform these operations, but rather should view this course as an opportunity to explore the robotic platform for consideration of future training to perform cases in their own practices.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Introduce the robotic platform to surgeons without prior robotic experience for the role of inguinal hernia repair
• Demonstrate the technique of robotic TAPP
• Review inguinal anatomy as viewed from a transabdominal approach

INVITED FACULTY
Conrad Ballecer, MD; Andrew Bates, MD; James Bittner, MD; Eduardo Parra-Davila, MD; Eugene Otto Dickens, MD; Omar Yusef Kudsi, MD; Ajita Prabhu, MD; Thomas Swope, MD; Shirin Towsfigh, MD; Linda Zhang, MD

COURSE CRITERIA
Participants should have some experience performing other forms of robotic surgery in order to fully benefit from this course.
Wednesday, March 22, 2017

SAGES University Masters Series:
The SAGES Masters Take You to Foregut School
Chair: Brant Oelschlager, MD | Co-Chair: Jon Gould, MD

SESSION DESCRIPTION
This session is designed for practicing surgeons treating foregut diseases who want to learn the most up to date management strategies from renowned experts. We will cover controversial topics in achalasia, GERD and paraesophageal hernia repair.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Interpret the most recent information on the treatment of Achalasia and help guide their patients towards the best treatment options
• Compare and contrast the options for the surgical treatment of GERD and apply them clinically
• Recognize the challenges related to hiatal hernia repair and antireflux surgery and develop better treatment strategies

Workshop: Get Published – How to Write a Scientific Manuscript
Chair: Abe Fingerhut, MD | Co-Chair: Mark Talamini, MD

SESSION DESCRIPTION
Publish or perish!! Credit for advances in surgery are marked by successful publication in peer reviewed journals, and are the most important single element of surgical career development. In this continuation of morning session workshop, we will go through the creation of a manuscript with an eye toward maximizing the likelihood of publication. Be sure to bring your manuscript in progress, as this is a working session!!

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Articulate the types of manuscripts and the components of a scientific manuscript
• Construct a surgical scientific manuscript, prepare it for publication, and improve it’s likelihood of acceptance through critical appraisal and editing
• Manage and navigate the peer review process

**Panel: Meeting the ABS Mandate - The Program Director’s Guide to the FEC Galaxy**

Chair: Thadeus Trus, MD | Co-Chair: Eric Pauli, MD

**SESSION DESCRIPTION**
Flexible endoscopy training has become an integral part of general surgery training and practice. The American Board of Surgery has mandated incorporation of a Flexible Endoscopy Curriculum (FEC) into resident training programs. Introducing comprehensive flexible endoscopy training is challenging for many residency programs. This session is geared towards surgical educators, program directors, fellows and residents to facilitate implementation of the FEC in their institutions. A variety of innovative methods and tools are discussed to allow Flexible Endoscopy training in a variety of different settings.

**SESSION OBJECTIVES**
At the conclusion of this session, participants will be able to:
- Describe the rationale for the introduction of the FEC into surgical training
- Employ new strategies to introduce endoscopy training into the surgical residency training
- Employ a variety of training options for hands on endoscopic training and tools to prepare for FES certification

**ACTIVITY OUTLINE**

**Your Session: Prevention of Bile Duct Injury**

Chair: L. Michael Brunt, MD | Co-Chair: Rajesh Aggarwal, MBBS, MA, PhD

**Session Description**
This session will address strategies around cholecystectomy that surgeons can employ to help reduce biliary injury with an emphasis on video to illustrate essential points. The session is intended for practicing surgeons, surgical residents and fellows who manage patients with various gallbladder disorders and will encourage audience participation and feedback.

**SESSION OBJECTIVES**
At the conclusion of this session, participants will be able to:
- Identify a variety of strategies that can be used to reduce the risk of biliary injury during cholecystectomy
- Discuss the role of imaging in the prevention of biliary injury
- Recognize the criteria that constitute the critical view of safety (and which do not) during laparoscopic cholecystectomy

### The Devil is in the Details Session: Technical Tips from the Masters - Ventral Hernia

**Chair:** Brent Matthews, MD | **Co-Chair:** Andrew Duffy, MD

#### SESSION DESCRIPTION

This interactive session addresses master level topics in open, laparoscopic and robotic ventral hernia repair that allows attendees to see the thought processes and techniques of experienced surgeons. Lectures will highlight specific operative techniques during the critical aspects of complex ventral hernia repair. This course is intended for general surgeons, plastic surgeons, and acute care and emergency surgeons, fellows and residents who care for patients with hernias or hernia-related complications and seek to enhance their understanding of this clinical problem in order to optimize management of their patients.

#### Session Objectives

At the conclusion of this session, participants will be able to:
- Implement a 4:1 suture length to wound length closure technique for midline laparotomy wounds
- Describe and contrast transversus abdominis release with modified Sugarbaker technique and stapled mesh stoma reinforcement technique for parastomal hernia repair
- Apply the technique for bone anchor fixation to the iliac crest or pubic bone for ventral hernia repair

Symposium: Coaching and Telementoring in the Global Arena - Project 6
Chair: Allan Okrainec, MD | Co-Chair: David Chen, MD

SESSION DESCRIPTION
Advances in technology and communications have made telementoring an important part of training, knowledge and skill acquisition, collaboration, and outreach. This session focuses on technical logistics, real life practices, and emerging technologies that utilize telementoring to train, mentor, and coach in the global arena.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:

- Recognize the technical requirements needed to implement a telementoring program
- Compare how various technologies are being used today for telementoring different types of surgical procedures globally
- Identify new technology that is being developed to improve telementoring and distance learning in the future

AAST Joint Panel: Acute Care Surgery
Chair: Robert Lim, MD | Co-Chair: Kimberly Davis, MD, MBA

SESSION DESCRIPTION
The acute care surgery model encompasses urgent general surgery, trauma and surgical critical care, delivering time sensitive care to patients requiring urgent and emergent surgical interventions. Traditionally, these operations have been performed in an open manner. However, with the increased utilization of laparoscopy, there may be a roll for increasing the use of laparoscopy in the acute care setting. The purpose of this session is to identify the explore the role for laparoscopic interventions in the provision of acute care surgery.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Identify the areas where laparoscopic skill development may benefit the Acute Care Surgeon
• Compare and contrast areas where open, laparoscopic or endoscopic intervention may be more beneficial to the acute care patient
• Illustrate and recommend management strategies for the bariatric surgery patient who presents acutely

KSELS Joint Panel: Gastric Cancer – Narrowing the Gap Between Eastern and Western Practice in Laparoscopic Gastric Surgery
Chair: Ho-Seong Han, MD, PhD | Co-Chair: Barry Salky, MD

SESSION DESCRIPTION
Gastric Cancer is common in Asian countries such as Korea and Japan, in comparison to the United States where this disease occurs infrequently. With ethnic variety in the population in America, the incidence of this disease is increasing. As laparoscopic gastric surgery is well accepted in early gastric cancer, this session provides an opportunity for both countries to share their experiences in this field.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Describe the indications for different types of laparoscopic gastrectomy
• Understand the advantages of laparoscopic gastric surgery
• Learn the basic steps of the technique of laparoscopic gastric surgery
The Devil is in the Details Session: Technical Tips from the Masters - Bariatric Conversion
Chair: Daniel Herron, MD | Co-Chair: Marina Kurian, MD

SESSION DESCRIPTION
Conversions or revisions represent a rapidly expanding component of many bariatric practices. Hear from a highly experienced group of experts about how to best approach band and sleeve conversions. This session will focus on technical pearls, tips and tricks with regards to specific indications for bariatric conversions. This course is for surgeons and allied health professionals who are looking to optimize management of the bariatric patient who is struggling with poor weight loss or difficult side effects from their procedure.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Employ different options for sleeve and band conversion
• Interpret preoperative criteria to best identify an appropriate candidate and procedure for conversion
• Compare the expected outcomes vs the risks for the different conversion procedures

Video Face-Off Panel:
Laparoscopic Nissen Fundoplication
Chair: Ozanan Meireles, MD | Co-Chair: Kyle Perry, MD

SESSION DESCRIPTION
GERD is very prevalent in the US, affecting as much as 20% of the population; and Nissen Fundoplication is still the surgical Gold-standard for the treatment of this disease. General surgeons need to become familiar with the critical steps of this operation, be knowledgeable when recommending and skillful when performing Nissen Fundoplication.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Identify the fundamental principles of laparoscopic Nissen fundoplication
• Recognize how different approaches to the dissection and performance of fundoplication may be used to achieve these principles
• Compare different techniques from expert surgeons, understand the nuances between them, and potentially incorporate some of them into clinical practice

Social Media and Health Care

Speaker: Brian P. Jacob, MD
Dr. Brian P. Jacob is an American Board Certified minimally invasive general and bariatric surgeon, and founder of a startup company called the International Hernia Collaboration, Inc. He operates at Mount Sinai Medical Center and at Midtown Surgery Center in New York City. Dr. Jacob performs a variety of surgical procedures, but has a special interest in treating the diseases of hernia, groin pain, abdominal pain, and obesity.

In an effort of help optimize patient outcomes after hernia repair, in 2012 Dr. Jacob launched the International Hernia Collaboration (IHC), a private Facebook™ group of over 2500 hernia surgeons and hernia industry partners. He believes here there is significant power in large focused professional networks like the IHC, and thus expects the continued growth of it, and other groups like it, to rapidly change the way medical information is disseminated and exchanged in order to improve the care we bring to our patients.

Dr. Jacob serves on the board of governors for SAGES and for AHS, and is the social media subcommittee chair at ACS. He has 4 children and now lives in Demarest, NJ.

Postgraduate Course: ILLS Joint Session – Overview of Minimally Invasive Liver Resection
Chair: Daniel Cherqui, MD | Co-Chair: Go Wakabayashi, MD, PhD

SESSION DESCRIPTION
Laparoscopic liver resection is now utilized for select cases of benign liver masses, primary and metastatic liver tumors, and live donor hepatectomy for liver transplantation. This session will provide an overview of the indications, as well as short-term benefits and long-term outcomes of laparoscopic liver resection.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Describe indications for laparoscopic liver resection
• Develop minimally invasive liver resection techniques
• Assess short and long term outcomes of laparoscopic liver resection

Postgraduate Course: SMART Enhanced Recovery – Beyond Colorectal
Chair: Thomas Aloia, MD | Co-Chair: Bruce Ramshaw, MD

SESSION DESCRIPTION
Enhanced recovery is an established perioperative care plan in colorectal surgery. The feasibility and efficacy in non-colorectal fields is in evolution. The purpose of this session is to describe goals, strategies and tactics for achieving success with these unique programs. Special emphasis will be on analytic models and future directions in clinical research regarding enhanced recovery pathways.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Describe how system science including factor analysis can be used to measure the success of enhanced recovery
• Describe the elements and outcomes related to enhanced recovery after these types of surgery:
  - Foregut/esophagus
  - HPB
  - Bariatric
  - Hernia repair

Program of the “Americas” Joint Panel: What I Thought was a Fact is a Myth?
Chair: Natan Zundel, MD | Co-Chair: Samuel Shuchleib, MD and Antonio Bispo, MD

SESSION DESCRIPTION
There are some controversial subjects, for which we think we have the answers. Sometimes, however, there is a lack of evidence to support these “facts” which are actually just myths. In this session we will hear from experts across the Americas who will discuss some controversial “facts” and present both sides of the coin so that you can decide fact or myth for yourself.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Distinguish between the treatment options for achalasia
• Interpret the available data for the use of laparoscopic inguinal hernia surgery
• Apply the best available evidence to select the right bariatric operation for the right patient
• Compare and contrast the treatment options for CBD stones when cholecystectomy is planned

Video Face-Off Panel: Lap Band to Gastric Bypass
Chair: Alfons Pomp, MD | Co-Chair: Aurora Pryor, MD

SESSION DESCRIPTION
The laparoscopic adjustable gastric band was a popular operation that is associated with a significant incidence of complications and weight loss failures requiring revision. A laparoscopic revision from laparoscopic gastric band to gastric bypass is an operation that should be part of the bariatric surgeon’s armamentarium. Recognized experts in the field will use video to demonstrate technical tips and tricks to help you better perform this procedure.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Distinguish between different indications for laparoscopic band revision to gastric bypass
• Illustrate several surgical techniques for lap band to gastric bypass surgery
• Develop surgical strategies to allow surgeons to safely perform this operation and trouble-shoot when necessary

Check the SAGES website and 2017 Meeting App frequently for SAGES Foundation and/or Industry events (not planned nor accredited for CME by SAGES) which may have been added after this program was printed.

Panel: Firsts and Pioneers - Evolutions and Revolutions in Surgery
Chair: Steve Eubanks, MD | Co-Chair: Sharon Bachman, MD

SESSION DESCRIPTION
This session will focus on the history of the early phases of the development of laparoscopic and endoscopic surgery. A factual and detailed description of "first" procedures will be presented by pioneers followed by a discussion of the motivations, obstacles, and successes they encountered.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Articulate the accurate history of surgical “firsts”
• Employ accepted approaches to introducing new techniques and technologies
• Apply advice and lessons learned from pioneers when introducing new devices and procedures

Educator’s Luncheon “Can I Trust my Trainees to do it Right?” Entrustable Professional Activities (EPA’s) for Competency-Based Surgical Education
Chair: Matthew Ritter, MD

SESSION DESCRIPTION
Surgical Educators battle with entrustment decisions daily. Having a way to more clearly quantify what a trainee can be allowed to do independently leads to more efficient training and the natural development of much needed autonomy. EPA’s are a practical, and actionable way to begin consistently measuring competency and making entrustment decisions. This lunch time session will review what EPA’s are, how they are developed, and where surgical education is headed with the application of these useful tools.
Who should attend: Clinical Faculty, Residency and Fellowship Program Directors, Simulation Program Directors, Clinical Competency Committee members, and Surgical Educators.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Describe how EPA’s facilitate assessment of Core Competencies and achievement of Sub Competency Milestones
• Identify what leading organizations like the American Board of Surgery and SAGES are doing to define EPA’s for Surgeons
• Recognize how SAGES Surgeons can be involved in ongoing initiatives to develop EPA’s for MIS

The entire 2017 meeting has been designated for Self-Assessment CME Credit, applicable to Part 2 of the American Board of Surgery (ABS) Maintenance of Certification (MOC) Program. In order to claim Self-Assessment credit, attendees must participate in a post meeting quiz.

**12:00 PM - 1:30 PM**

Eat & Greet Lunch in the Exhibit Hall for All Attendees

Enjoy free lunch while you explore latest products and technologies offered by our exhibits.

**12:15 PM - 1:15 PM**

Let’s Do Lunch - Hernia, Liver/Biliary, Esophagus & Colon Tables

Chair: John Stauffer, MD

SAGES does not offer CME for this activity

Four tables to choose from, each limited to 10 attendees. Casual lunch discussions with your colleagues as if you would be in the surgeon’s lounge discussing cases.

**Facilitators:** Ajita Prabhu, MD & Igor Belyansky, MD (Hernia), John Stauffer, MD (Liver/Biliary), E. Fernando Elli, MD (Esophagus), Marylise Boutros, MD (Colon)

**12:15 PM - 1:15 PM**

Community Practice Townhall

SAGES does not offer CME for this activity

Hosted by the Membership Committee, the Community Practice Townhall is an opportunity for private practice, community-based or hospital employed surgeons to network and discuss common issues. By sharing problems and solutions we can help SAGES work for you. We hope you can make it! Box lunch will be available.

**12:30 PM - 6:30 PM**

Hands-On Course: Lap Colon ADOPT (Immersion Program with Mentorship)

Chair: Jaime Sanchez, MD | Co-Chair: Peter Marcello, MD

**SESSION DESCRIPTION**

We all had adequate training during our residencies but there are still challenges that we face on a daily basis, whether it be the patient’s obesity, dense inflammation, or unclear anatomy that require a conversion to an open procedure. We may wish to offer a minimally invasive operation but may not have ALL the skill sets to handle a patient’s anatomy, body habitus, or condition. We have designed this IMMERSION program to allow you to take your skills to the next level.

Prior to the hands on course, attendees will review operative videos of both right and left laparoscopic colectomies and be assigned mentors with whom they will meet to discuss personalized training objectives. During the course, attendees will train on cadavers at the MITIE lab, and faculty will use standardized teaching techniques proven to improve operative learning. This course will have a 1 faculty to 2 students ratio. Following course completion, participants will continue to receive ongoing mentor interactions including scheduled webinars and video reviews of their cases. Those learners who have fully participated in the year-long program will have the opportunity to present their experience as a podium presentation at the 2018 SAGES Meeting.

**Previous ADOPT course attendees rave about the program:**

The ADOPT program has been a very positive experience…My mentor has been exceptional at answering questions in a timely manner and offering practical advice on difficult cases. Participating in this program has greatly increased my confidence in performing complex hernia repairs, because I know I am performing them efficiently and effectively.

– Dr. Christina Sanders, 2015 ADOPT Participant
Thursday, March 23, 2017

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:

- Formulate an operative plan for the performance of laparoscopic left and right colectomy
- Identify proper anatomical planes and isolate anatomic structures for the performance of laparoscopic left and right colectomy
- Competently conduct the technical steps of laparoscopic left and right colectomy

Course Limitation: This course is limited to practicing physicians no longer in training and it is important that attendees perform at least 20 colon cases per year. With this volume, the likelihood of adopting laparoscopic colectomy in practice is increased.

Invited Faculty: Greta Bernier, MD; Tom Cecil, MD; Mark Coleman, MD, MBChB; Todd Francone, MD; Michael Grieco, MD; Eric Haas, MD; Sang W. Lee, MD; Jorge Marcket, MD; Lisa Moudgill, MD; Nabil Tariq, MD

Workshop: SMART Enhanced Recovery for the Team
Chair: Liane Feldman, MD | Co-Chair: Pascal Fuchshuber, MD

SESSION DESCRIPTION
Enhanced Recovery Programs (ERPs) incorporate multiple evidence-based interventions into a single perioperative care plan to reduce resource use and complications and increase patient satisfaction. ERPs encompass the entire perioperative trajectory and require interdisciplinary teamwork to implement. The SAGES SMART ERP provides a starting point to help SAGES members implement ERPs in their hospital (http://www.sages.org/smart-enhanced-recovery-program/). SMART provides a generic template that can be adopted for a variety of procedures, both MIS and open, including bowel, hernia, foregut and bariatric. This workshop will review the SMART recommendations and provide templates for patient education materials, order sets and nursing guidelines to help teams get their own ERPs into practice. The workshop is geared towards teams working to implement ERPs and ideally surgeons, anesthesiologists and nurses would attend the workshop together. In addition, the workshop will be of interest to teams encountering specific problems during implementation or who wish to expand their ERPs to new procedures. The workshop will include a mixture of presentations and hands-on experience with the SMART materials and discussion with expert faculty with ERPs in a variety of areas. Workshop attendees will form a SMART surgery community and continue to be mentored through implementation in the year after the workshop.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:

- Develop standardized, multimodal, evidence-based order sets
- Identify strategies to overcome barriers in ERP implementation
- Use the SMART web page to increase knowledge of ERPs

Postgraduate Course: ILLS Joint Session - Techniques of Laparoscopic Liver Resection Video Session and Liver Tumor Board
Chair: David Geller, MD | Co-Chair: Claudius Conrad, MD, PhD

SESSION DESCRIPTION
Laparoscopic liver resection is now utilized for not only select cases of benign liver masses, but also primary and metastatic liver tumors, and live donor hepatectomy for liver transplantation. This session will provide an overview of the indications and techniques of laparoscopic liver resection. The session will include educational videos and a Liver Tumor Board of 4 challenging liver tumor cases.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Describe indications for laparoscopic liver resection
• Develop safe and oncologically sound minimally invasive liver resection techniques
• Assess short and long term outcomes of laparoscopic liver resection

SAGES/ASMBS Joint Appropriateness Conference on Metabolic Surgery
Chair: Daniel Jones, MD | Co-Chair: Dana Telem, MD

SESSION DESCRIPTION
The indications and best practices for obesity surgery are evolving in the era of laparoscopy, endoscopy, multidisciplinary teams, facility accreditation, and specialty training. The field of bariatric and metabolic surgery touts improved outcomes, quality initiatives and advances in patient safety over the last decade. The Appropriateness Conference reviews updated guidelines from multiple societies.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Recognize currently accepted bariatric operations and appropriate indications for these procedures
• Identify best practices surrounding perioperative management of the bariatric patient
• Assess the optimal training to become a bariatric surgeon
• Understand the role of accreditation in bariatric surgery

Check the SAGES website and 2017 Meeting App Frequently for SAGES Foundation and/or Industry events (not planned nor accredited for CME by SAGES) which may have been added after this program was printed.

**JSES Joint Panel: What Can We Learn from Each Other? MIS Trends in North America and Japan**

Chair: Manabu Yamamoto, MD | Co-Chair: Dimitrios Stefanidis, MD, PhD

**SESSION DESCRIPTION**

Both Japan and the United States and Canada have been leaders in advancing minimally invasive and endoscopic surgery for the benefit of our patients. In this panel, we will explore minimally invasive and endoscopic surgery trends in each country for common surgical diseases. The latest endoscopic and robotic approaches to patient care in each country will be presented. The newest enhanced recovery pathways implemented will be discussed and advances in surgical training will be compared between countries.

**SESSION OBJECTIVES**

At the conclusion of this session, participants will be able to:
- Identify the latest trends and technologic innovations in MIS and endoscopic surgery
- Evaluate different surgical techniques and adopt new training paradigms
- Compare the similarities and differences in surgical approaches to common diseases between Japan and North America

Lecture: Controversies in the Management of Foregut Disease (Presented TED Style)
Chair: Brian Dunkin, MD | Co-Chair: Steven Schwatzberg, MD

SESSION DESCRIPTION
This unique session will have world leaders in the management of foregut disease present real clinical controversies TED style. Each speaker will share patient stories to explore the management of debated foregut issues such as POEM versus Heller for achalasia, and paraesophageal hernia repair in the elderly. Following each presentation, the audience will have the opportunity to interact with the presenters and moderators in a relaxed atmosphere to explore each topic in greater detail. This session won’t be your usual “death by PowerPoint”. Come ready to be entertained and informed!

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Compare per oral endoscopic myotomy (POEM) to laparoscopic Heller myotomy from an effectiveness and cost-benefit perspective
• Manage GERD after Bariatric surgery
• Articulate management strategies for recurrent hiatal hernias

Video Face-Off Panel:
Minimally Invasive Inguinal Hernia Repair
Chair: Shirin Towfigh, MD | Co-Chair: Edward Felix, MD

SESSION DESCRIPTION
3/4 million inguinal hernias are repaired in the US alone. This video session will share tips and tricks from experts for repair of routine inguinal hernias, novel techniques for inguinal hernia repair, and repairs of rare types and complications of inguinal hernias and findings.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Demonstrate complications from inguinal hernia repair and recommend techniques to address them
• Illustrate rare types of inguinal hernias and hernia-related findings and review techniques to repair them
• Recognize complications of inguinal hernia repair and demonstrate techniques to address or prevent them

SAGES University Masters Series: Laparoscopy in Acute Care Surgery
Chair: Michael Cripps, MD | Co-Chair: Carla Pugh, MD, PhD

SESSION DESCRIPTION
Acute Care Surgery has emerged as a surgical specialty that provides time sensitive care across a broad scope of surgical disease. It is recognized that surgical care provided in an emergency setting compared to an elective setting can bring with it the potential added layers of complexity of metabolic derangements and anatomic distortions from acute inflammatory reactions. Although these operations have been traditionally approached in an open fashion, the use of laparoscopy in skilled hands can often be used in the acute care setting. This course is intended for general surgeons, acute care surgeons, and anyone looking to improve their understanding of the utilization of laparoscopic techniques in emergency surgery on a mastery level.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Distinguish the laparoscopic approaches and methods used for complex perforated peptic ulcer disease
• Illustrate the effectiveness of laparoscopy in the treatment of complicated pancreatitis
• Develop a strategy for the surgical management of Mirizzi’s Syndrome
• Identify areas of improvement in the emergency treatment of ventral hernias

SS: SAGES Got Talent - Resident & Fellow Scientific Session
Chair: Philip Pucher, MD, PhD | Co-Chair: Kyle Kleppe, MD

SESSION DESCRIPTION
In this session, residents and fellows representing the next generation of SAGES members will present their best research to a panel of expert faculty. A selection of the top submitted abstracts will ensure top quality research with a broad range of current topics. After each presentation, expert panelists will rank each resident/fellow presenter with regards to:
1. Study contents
2. Significance in clinical surgery
3. Originality
4. Study designs/methodology
5. Interpretation and analysis of study findings/results
6. Appropriate use of statistical tests
7. Overall presentation skills, including slides, clarity of presentation, and audience engagement
Awards will be given to two (2) top presenters at the conclusion of the session.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Identify and discuss challenges and pitfalls in research design, methodology and data mining, interpretation of research findings, and potential clinical applications in practice of surgery
• Identify future/potential research topics related to the presented subjects, that are feasible by surgical residents and fellows during their clinical training or dedicated research time
• Acquire an appreciation for the depth, breadth and importance of research conducted by surgical residents and fellows for academic and clinical knowledge developments, as well as contributions to the science of surgery
• Recognize optimum preparation and communication skills to deliver concise 7-8 minute presentation
Thursday, March 23, 2017

Symposium: International Hernia Collaboration Symposium
Chair: Igor Belyansky, MD | Co-Chair: Conrad Ballecer, MD

SESSION DESCRIPTION
Social Media Platforms are now widely used venues for surgeons to stay up-to-date on current literature and to discuss diagnostic dilemmas. These closed groups have also become places to receive immediate peer-review feedback regarding new surgical techniques and patient management. This session will focus on common topics discussed in a private Facebook hernia group and is intended for surgeons with interest in disorders of the abdominal wall.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Identify which method of inguinal hernia repair is most appropriate for each patient
• Integrate retromuscular repair into their practice
• Evaluate the need for robotic assisted surgery in their practice

Video Face-Off Panel: Common Bile Duct Exploration - More than one way to Skin a Cat
Chair: Jeffrey Hazey, MD | Co-Chair: Jeffrey Ponsky, MD

SESSION DESCRIPTION
Common bile duct stones (CBDS) can occur in 3-15% of patients with choledocholithiasis. Every general surgeon will encounter CBDS in his/her career. Management of CBDS is variable as many general surgeons have limited experience with common bile duct exploration (both laparoscopic and open). Additionally, management of CBDS by gastroenterologists and interventional radiologists is variable and dependent on practice locale and expertise. This video session is to provide insight and offer techniques for the management of CBDS by the general surgeon.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Describe the steps and techniques for open and laparoscopic common bile duct exploration
• Distinguish and articulate the multidisciplinary therapeutic options for common bile duct stones/access

The Devil is in the Details Session: Technical Tips from the Masters - Laparoscopic Gastrectomy for Malignancy
Chair: Lorenzo Ferri, MD | Co-Chair: Magnus Nilsson, MD

SESSION DESCRIPTION
Resection remains the cornerstone of any curative treatment plan for gastric cancer, and more frequently a laparoscopic approach is being adopted as the preferred method. As there are numerous operative variables for every step of the procedure, this session will highlight technical tips from leading gastric cancer surgeons with differing perspectives from across the Globe.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Describe the technical steps required for a safe and effective laparoscopic gastrectomy for cancer
• Critically evaluate their own surgical approach to the minimally invasive gastrectomy
• Integrate newly learned technical tips into clinical practice

Medical Student Townhall
SAGES does not offer CME for this session
Hosted by the Membership Committee, all medical students are welcome to attend this one-hour session that provides a forum to learn how SAGES can support a career in Adv GI/MIS and Flexible Endoscopy.

Plenary Session 1

Presidential Address
Speaker: Daniel J. Scott, MD
Dr. Daniel Scott attended Southern Methodist University in Dallas and studied Biomedical Engineering on a full tuition scholarship. He completed medical school at Louisiana State University School of Medicine, and graduated as a member of the Alpha Omega Alpha Honor Society. He pursued residency training in General Surgery and completed a 2-year fellowship in Advanced Laparoscopic Surgery at the University of Texas Southwestern Medical Center. Following completion of his training in 2002, he served as faculty at Tulane University School of Medicine for 3 years and established the school’s first center focusing on laparoscopic surgery, which included a state-of-the-art Simulation and Training Laboratory, a Laparoscopic Fellowship Program, a multi-disciplinary Bariatric Surgery Program, and a Robotic Surgery Program. Due to hurricane Katrina, Dr. Scott and his family relocated to Dallas in 2005. Dr. Scott was warmly embraced by his colleagues at UT Southwestern and is currently Professor of Surgery, Vice Chairman of Education, Assistant Dean of Simulation & Student Integration for Graduate Medical Education, Director of UT Southwestern Simulation Center, Director of the Minimally Invasive/ Bariatric Surgery Fellowship Program, and holds the Frank H. Kidd, Jr. MD Distinguished Professorship in Surgery. Dr. Scott also serves as the Executive Director of the Southwestern Center for Minimally Invasive Surgery, which is accredited by the American College of Surgeons (ACS) as a Level I Education Institute and by the Society of American Gastrointestinal and Endoscopic Surgeons (SAGES) as a Fundamentals of Laparoscopic Surgery (FLS), Fundamentals of Endoscopic Surgery (FES), and Fundamental Use of Surgical Energy (FUSE) Test Center. Dr. Scott oversees numerous educational activities within the Department of Surgery and has special interests in technical skills training, performance assessment and competency.

Dr. Scott is nationally and internationally recognized as an expert in the clinical areas of minimally invasive general surgery, including bariatric, foregut, and hernia surgery. Dr. Scott’s research interests focus on emerging surgical techniques and technologies, as well as simulation-based surgical education and novel methods for achieving mastery. He has authored 179 publications, including books, monographs, chapters, manuscripts, and videos, all focusing on various areas of minimally invasive and gastrointestinal surgery, including novel surgical devices and approaches, Bariatrics, GERD, Achalasia, Hernia, Robotics, and Surgical Education. Dr. Scott has received grants from the Agency for Healthcare Research and Quality (AHRQ) and other organizations for simulation-based training and device development research.

Gerald Marks Lecture “Competency Based Surgical Training: the Solution?”
Speaker: H. Jaap Bonjer, MD, PhD
In this keynote, aimed for surgeons and surgical residents, Dr. Bonjer will discuss the elements, implementation and outcomes of competency based surgical training programs. Since 2009, Dr. Bonjer assumed the position of Chairman and Professor of the Department of Surgery at the Free University Medical Centre in Amsterdam. His clinical and research activities focus on endocrine surgery and minimally invasive surgery.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Articulate the essential elements of competency based learning
• Develop a stepwise process to build a competency based program
• Recognize the patient, professional and societal needs to adjust current surgical training programs
Friday, March 24, 2017

**Your Session: Management of Complications of Bariatric Surgery**
Chair: Raul Rosenthal, MD | Co-Chair: Ninh Nguyen, MD

**SESSION DESCRIPTION**
As the obesity pandemic continues to spread, patients are seeking surgical treatment for this lethal disease. With mortality rates of 0.3%, bariatric surgical options such as gastric bypass and sleeve gastrectomy are considered to be extremely safe. Despite this, patients, and given the large volume of these procedures performed around the world, present to our emergency rooms with complications that will need prompt diagnosis and management. This session, composed of topics selected by SAGES members, will provide attendees with an overview of best practices in the management of the most common bariatric surgical complications.

**SESSION OBJECTIVES**
At the conclusion of this session, participants will be able to:
- Identify the most common complications after bariatric procedures
- Implement standard algorithms to diagnose complications of bariatric surgery early
- Apply best practices when managing these complications

**Panel: Finishing Residency; I'm Done! Now What? - Transitioning to Practice**
Chair: David Urbach, MD | Co-Chair: David Renton, MD

**SESSION DESCRIPTION**
This session will discuss the essentials of starting surgical practice after completing surgical training, including finding and negotiating jobs in surgery, financial and clinical aspects of running a surgical practice, balancing a surgical career with personal life, and strategies for academic success. This session is intended for surgical trainees at all levels, including medical students, residents and fellows, and early-career faculty (within about 5 years of starting independent practice).

**SESSION OBJECTIVES**
At the conclusion of this session, participants will be able to:
- Prepare for a surgical job interview and use effective negotiation strategies, including a review of practice structures and contract do’s and don’ts
- Implement strategies within their practice to improve patient care, and to make their practice financially sustainable, including a review of quality metrics for surgeons
- Manage their finances to plan for life events and retirement
- Present their scholarly work in surgery in medical journals and scientific meetings

The Devil is in the Details Session: Technical Tips from the Masters - Laparoscopic Hartman’s Reversal and Laparoscopic Lavage

Chair: Peter Marcello, MD | Co-Chair: Steven Wexner, MD

SESSION DESCRIPTION
Colonic diverticulitis is a challenging disease which can present with a full spectrum of inflammatory states from minor inflammation to feculent peritonitis. There are a multitude of surgical procedures which are utilized to manage this condition. This session focuses on the technical aspects of these procedures.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Determine maneuvers to successfully complete laparoscopic resection complicated by obesity and complex disease
• Illustrate precise technical details of laparoscopic Hartmann reversal and lavage for complex diverticulitis
• Demonstrate technical options to allow for successful colorectal anastomosis

The Devil is in the Details Session: Technical Tips from the Masters - Treatment of Recurrent Achalasia

Chair: C. Daniel Smith, MD | Co-Chair: Steven Bowers, MD

SESSION DESCRIPTION
This session is designed for the Foregut surgeon who has developed advanced laparoscopic skills and is already performing laparoscopic Heller myotomy and seeks practical tips in decision making and operative performance in revisional operations for recurrent dysphagia after esophago-gastric myotomy for achalasia. Operative strategies will include the use of endoscopic therapies including pneumatic balloon dilation and POEM, revisional Heller motomy, and resection techniques for sigmoid or mega-esophagus.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Formulate a strategy for caring for the patient with recurrent dysphagia after myotomy for achalasia
• Develop skills and a plan for carrying out revisional operations in the patient after Heller myotomy
• Recognize those patient factors associated with problems at operation

Your Session: Abdominal Wall Hernia - Provocative Questions in the Practice of Hernia Repair
Chair: Gina Adrales, MD, MPH | Co-Chair: Guy Voeller, MD

SESSION DESCRIPTION
Hernia repair is an increasingly common operation, with over 350,000 ventral hernia repairs being performed annually in the United States alone. New techniques and approaches to this complex problem have emerged yet questions remain for the general surgeon in applying these techniques in daily practice. This session includes the most popular topics in hernia surgery selected by SAGES members.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Describe laparotomy closure techniques to prevent incisional hernias
• Employ new strategies to prevent and effectively treat parastomal hernias
• Demonstrate mapping technique in the evaluation of chronic pain after inguinal hernia repair

Fellowship Council Luncheon “Ensuring Competency Through Fellowship Training: Frameworks for Success”
Chair: Raul Rosenthal, MD

SESSION DESCRIPTION
Surgical training is currently undergoing significant changes and current techniques and management strategies are becoming obsolete. This session will cover topics related to fellowship training models that range from using milestones, simulation and mental training. Faculty will also address what the main entry points for fellows are in order to achieve mastery when starting an independent surgical practice. Program directors, residents and fellows will benefit greatly by attending this session.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Describe a milestone-based training model or fellowship training
• Employ new strategies such as simulation and mental training to achieve mastery in a shorter period of time
• Define entry points when transitioning to practice

Friday, March 24, 2017

12:00 PM - 1:30 PM
Eat & Greet Lunch in the Exhibit Hall for All Attendees
Enjoy free lunch while you explore latest products and technologies offered by our exhibits.

12:15 PM - 1:30 PM
Let's Do Lunch - Gastric, Pancreas, Gallbladder/ERCP & Rectal Tables
Chair: John Stauffer, MD
SAGES does not offer CME for this activity
Four tables to choose from, each limited to 10 attendees. Casual lunch discussions with your colleagues as if you would be in the surgeon’s lounge discussing cases.
Facilitators: Tammy Kindel, MD (Gastric), John Stauffer, MD (Pancreas), Marc Mesleh, MD (Gallbladder/ERCP), Amit Merchea, MD (Rectal)

1:30 PM - 3:00 PM
AHPBA Joint Panel: Contemporary Themes in Minimally Invasive Pancreatic Surgery
Chair: Charles Vollmer, MD | Co-Chair: Karen Horvath, MD
SESSION DESCRIPTION
Given the rapid pace of technological advances, pancreatic surgery is a field in constant evolution. This session will focus on contemporary approaches to pancreatic surgery as well as how the next generation is trained to practice in this domain. The session spans themes in the care of pancreatitis, cancer, techniques and training and is relevant for all levels of surgeons from medical students to attending surgeons in practice.

1:30 PM - 5:30 PM
SAGES University Masters Series: Surgical Coaching - Tips to Enhance Skills of Trainees and Peers
Chair: Justin Dimick, MD, MPH | Co-Chairs: Neal Seymour, MD and Aimee Gardner, PhD
SESSION DESCRIPTION
Speakers will draw on the science of intraoperative teaching and the emerging literature on surgical coaching to improve the knowledge and skills of participants in these content areas. The workshop will focus on both real-time instruction in the operating room and post-operative video review.
SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• To understand the principles of how trainees acquire and retain skills
• To become aware of the importance of learning outcomes in setting a framework for teaching
• To learn different ways in which coaching conversations can be derailed

Panel: Endoscopic and Laparoscopic Enteral Access - How to Do It and How to Treat Complications
Chair: Jeffrey Marks, MD | Co-Chair: John Mellinger, MD

SESSION DESCRIPTION
Enteral access is one of the most common endoscopic and laparoscopic procedures performed by general surgeons. Safe performance of enteral access requires an understanding of the appropriate indications, procedural steps, and management of complications. This session, through video-based presentations, will provide a comprehensive overview for surgeons and surgical endoscopists of all skill levels.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:

• Compare endoscopic and laparoscopic techniques for obtaining enteral access
• Identify management options for early complications of enteral access
• Formulate a strategy for treating delayed complications of enteral access

Panel: Global Surgery - I Want to Do it! Where Do I Start? What Do I Need?
Chair: Adrian Park, MD | Co-Chair: Ray Price, MD

SESSION DESCRIPTION
SAGES surgeons are increasingly aware of unmet surgical needs in low and middle income countries (LMIC) around the world. The scope of Global Surgery and opportunities it may provide to serve and enhance their professional development is less well understood. This session will illuminate the growing field of Global Surgery and provide attendees with ideas and avenues to get engaged in some of these very worthy endeavors.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:

• Describe the concept of Essential Surgery as defined by the WHA
• Discriminate between elective, urgent and disaster response surgical opportunities in LMICs and the skill sets required of the surgeons who are best suited to serve in these various settings
• Evaluate the best opportunities and “fit” to contribute and engage in global surgery
**Friday, March 24, 2017**

**Video Face-Off Panel: Lap Right Colon**

Chair: Patricia Sylla, MD | Co-Chair: Dorin Colibaseanu, MD

### SESSION DESCRIPTION

This session will contrast different approaches and techniques to perform right colectomy in a minimally invasive fashion, ranging from multiport and single-port laparoscopy to robotics with intra- or extracorporeal anastomosis. This is a video forum, during which variations in surgical technique will be emphasized, including ileocolic for Crohn's disease and complete mesocolic excision for right colon cancer. Through video-based presentations, attendees will learn optimal strategies for selecting extraction sites, completing anastomoses intracorporeally, and overcoming visceral obesity and challenges of the reoperative abdomen. Management of intraoperative complications will emphasize tips and tricks on how to avoid conversion, when possible. This course is designed for any practicing surgeon who incorporates colon surgery into his or her practice.

### SESSION OBJECTIVES

At the conclusion of this session, participants will be able to:

- Implement the recommended key technical steps to complete laparoscopic right colectomy for benign and malignant disease
- Understand standard oncologic principles guiding the performance of MIS right colectomy for malignancy
- Appraise the relative advantages and disadvantages associated with various MIS strategies to perform right colectomy, as well as the anticipated level of technical difficulty and learning curve

ASCERS Joint Panel - Laparoscopy for IBD
Chair: Hermann Kessler, MD, PhD | Co-Chair: Tonia Young-Fadok, MD

SESSION DESCRIPTION
Crohn’s and Ulcerative Colitis cases often present with complex issues that require careful surgical planning using endoscopy and imaging. However, not all situations can be predicted by preoperative planning. The complexity continues into the actual operation, where the surgeon should be able to deploy a range of practical thinking skills plus operative skills. This session will focus on the minimally invasive surgical management of patients with IBD.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
- Anticipate the complexities of operating on patients with Crohn’s disease who have fistulas or require reoperative surgery
- Plan the most appropriate strategy of access in a patient with ulcerative colitis for a 3-step procedure
- Minimize surgical risk in patients with Crohn’s disease and ulcerative colitis with friable phlegmonous mesenteries

EAES Joint Panel:
Cutting Edge Minimally Invasive Surgeon in Europe
Chair: H. Jaap Bonjer, MD, PhD | Co-Chair: Silvana Perretta, MD

SESSION DESCRIPTION
Over the past twenty years there has been a slow but continuous migration from open surgery to less invasive, more patient friendly therapeutic options. The future of surgery is flexible, technology-enabled, enhanced by robotics and image-based, and will focus on less invasive approaches with the aim of cost-effective care. Presenting cutting edge MIS and exploring what is on the horizon, this session is designed for surgeons who are committed to providing patients with the best, least invasive treatments appropriate for their condition, and who are ready to challenge old dogmas.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
- Explore cutting edge MIS techniques to treat common gastrointestinal diseases
- Explore new strategies to manage common surgical complications using flexible endoscopy and percutaneous approaches
- Introduce precision image guided surgery for Intra-operative guidance and real time tissue imaging

The Devil is in the Details Session: Technical Tips from the Masters - Re-Do Anti-Reflux Surgery
Chair: David Rattner, MD | Co-Chair: Edward Philips, MD

SESSION DESCRIPTION
Re-operative antireflux surgery is an essential option tool to prevent recurrent reflux in patients with late failures of a fundoplication as well as to correct certain types of early complications from an anti-reflux procedure. This session addresses the scenarios where re-operative surgery is most likely to be beneficial and will illustrate the techniques that are most useful to conduct re-operations safely and successfully.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Identify remediable causes of fundoplication failures
• Employ safe techniques to identify altered post fundoplication anatomy and be able to restore normal anatomy as part of a reoperation
• Be able to employ multiple techniques for re-operative fundoplication that are tailored to the problem being addressed

Video Face-Off Panel: Distal Pancreatectomy
Chair: Paul Hansen, MD | Co-Chair: Michael Kendrick, MD

SESSION DESCRIPTION
In this session we will walk through a distal pancreatectomy, step by step, with leading experts in the field. The experts will show videos of their approach and the panel will discuss the key technical differences - pro’s and con’s.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Appreciate what experts consider to be the key steps of a distal pancreatectomy
• Compare alternative techniques for performing the key steps of a distal pancreatectomy
• Understand the advantages and disadvantages of different approaches to the key steps of a distal pancreatectomy

Your Session: Challenges in the Diagnosis and Management of GERD and Achalasia
Chair: Andrew Wright, MD | Co-Chair: Simon Bergman, MD

SESSION DESCRIPTION
In this innovative session, topics suggested and voted upon by SAGES members will be addressed by experts in the field with audience participation through the meeting app, social media, and live discussion. The focus will be on challenging and interesting problems in the management of reflux, achalasia, hypermotility disorders, and paraesophageal hernias.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Assess and manage patients with GERD who present with complex and challenging clinical scenarios such as obesity, recurrence, or concomitant motility disorders
• Apply and integrate new treatment strategies and techniques such as POEM for achalasia or magnetic sphincter augmentation for GERD
• Recognize and manage common and uncommon complications and side effects of anti-reflux and esophageal motility surgery

Panel: Robotic Surgery - New Platforms and Strategies to Overcome the Learning Curve
Chair: Omar Yusef Kudsi, MD, MBA | Co-Chair: Melissa Hogg, MD

SESSION DESCRIPTION
New robotic platforms can be associated with a significant learning curve and and numerous implementation obstacles related to team building. This session will focus on simulation, augmented virtual reality, procedure specific modules and team training as adjuncts to new robotic platforms that may help surgeons and their teams overcome the learning curve.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Appreciate the value of robotic specific procedure simulation
• Understand the value of team training to overcome the learning curve
• Describe the pros and cons of new robotic platforms

SSAT Joint Panel: Incidental GI Findings during Surgery
Chair: Kinga Powers, MD, PhD | Co-Chair: Nathaniel Soper, MD

SESSION DESCRIPTION
Incidental intraoperative findings pose unexpected challenges in clinical decision making and patient treatment. Guidance on operating beyond the scope of the initial surgical consent is difficult to find and may have significant medicolegal implications. General Surgeons need to anticipate facing potential unexpected findings unrelated or inconsistent with the primary diagnosis and have a sound strategy to manage them.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Articulate the ethical and medicolegal issues surrounding the management of unanticipated intraoperative findings
• Employ strategies to manage incidentally discovered HPB masses
• Recognize intraoperative findings that will necessitate changing tactics when managing colorectal malignancy
• Identify benign pathology that should change the planned operative procedure

Postgraduate Course:
Fundamental Use of Surgical Energy (FUSE)
Chair: Thomas Robinson, MD, MS | Co-Chair: Kenric Murayama, MD

SESSION DESCRIPTION
Energy-based devices are used in virtually every operation. Surgical training does not include formal education of surgical energy-based devices. The FUSE session aims to teach surgeons (1) the fundamental principles of surgical energy-based devices; (2) the safe use of surgical energy-based devices; (3) the patterns of surgical energy based device injuries; and (4) the effective use of these devices.

SESSION OBJECTIVES
At the conclusion of this session, participants will be able to:
• Know the mechanisms of actions by which common surgical energy-based devices work
• Understand the patterns by which surgical energy-based devices cause patient injury
• Identify common scenarios which promote the occurrence of surgical energy-based device complications

AGA Joint Session: Shark Tank
(Non-CME Activity)

SAGES does not offer CME for this activity
Chair: Jeffrey Marks, MD | Co-Chair: Michael Kochman, MD

SESSION DESCRIPTION
We are proud to introduce a new venue for novel ideas and for innovation to the SAGES annual meeting; the Shark Tank. The Shark Tank forum is meant to be an opportunity for innovators and companies to be able to showcase their non-marketed innovative ideas and concepts. This venue will allow for you and your company to receive feedback from an expert panel of innovators, investors, and larger companies in a safe environment so that you can further refine your concept and pitch to make success more probable. Additional information and applications may be found at sages2017.org/sharktank.

**Session: Wild Cases presented in the Wild West**
Chair: Christopher Schlachta, MD | Co-Chair: Ross Goldberg, MD

**SESSION DESCRIPTION**
This session is for students, residents and practicing endoscopic surgeons who have ever said “What do I do with this?” In the tradition of the Wild West, this session highlights a collection of “wild”, but inspiring, cases that required innovative thinking or bold surgical adventure.

**SESSION OBJECTIVES**
At the conclusion of this session, participants will be able to:
- Formulate a minimally invasive/endoscopic surgery management plan for unique and challenging surgical problems
- Identify minimally invasive options to solve novel clinical problems and rare clinical situations
- Manage difficult clinical cases and complications with an MIS first approach

**Panel: All grown up! Managing Adults with Congenital Surgical Anomalies**
Chair: Danielle Walsh, MD | Co-Chair: Gretchen Jackson, MD

**SESSION DESCRIPTION**
While congenital anomalies are largely repaired in childhood, some present in adult hood. Additionally, patients with complex congenital disorders increasingly survive to adulthood and transition into the adult system of surgical care. This session will focus on practical management of adults with congenital gastrointestinal disorders.

**SESSION OBJECTIVES**
At the conclusion of this session, participants will be able to:
- Predict potential complications related to prior repair of congenital anomalies
- Manage the adult presentation, complications, and long-term consequences of congenital gastrointestinal anomalies
- Organize a transition of care from pediatric to adult care for particularly complicated surgical patients

**Session: Emerging Technology**

(Non-CME Activity)

**SAGES does not offer CME for this activity**

**Chair: Kevin Wasco, MD | Co-Chair: Ozanan Meireles, MD**

**SESSION DESCRIPTION**

This session features the latest and newest techniques and technologies in gastrointestinal and endoscopic surgery. The 2 hour session is addressed to surgeons searching for new technologies, to medical staff open to future perspectives and to industry partners investing research in new developments. Careful selection of abstracts featuring new research and products will assure that attendees can take away key messages tailored for the near future. The abstract submission deadline is in early 2017 to allow for late-breaking developments.

**SESSION OBJECTIVES**

- Understand and use the most appropriate colon cancer screening method depending on patient risk factors
- Apply strategies to improve adenoma detection rates
- Select appropriate polypectomy methods for complete and safe resection of colon polyps
- Describe the follow-up and surveillance of patients after treatment of colon cancer

**Panel: Complications – Oops! When Things Go Wrong, What Do I Do Now?**

Chair: John Hagen, MD | Co-Chair: Amy Neville, MD

**SESSION DESCRIPTION**

This session is directed to all general surgeons that do laparoscopic surgery. We are going to show a series of videos where things go wrong. You are to imagine that you are the operating surgeon and need to figure out a plan as to how to get out of the trouble that is being shown on the video. We have a panel of “experts” who are wizards at getting out of trouble who will contribute to the lively discussion.

**SESSION OBJECTIVES**

At the conclusion of this session, participants will be able to:

- Recognize and assess surgical complications
- Identify options that might help resolve the problem
- Choose the best option given the circumstances

**SAGES University Masters Series:**

**AHS Joint Session - Ventral Hernia “It’s not just Hernia”**

Chair: Archana Ramaswamy, MD | Co-Chair: Dennis Klassen, MD

**SESSION DESCRIPTION**

Having a strong foundation regarding the principles of ventral hernia surgery helps to build an effective hernia practice. This Masters 100 session will focus on pathophysiology, different techniques of repair, avoidance of complications, and mesh selection from the experts in the field.

**SESSION OBJECTIVES**

At the conclusion of this session, participants will be able to:

- Recommend the type(s) of hernia repair which may best suit the patient
- Differentiate between types of abdominal wall closure to prevent hernias
- Recognize patients who require preoperative comorbidity modification prior to surgery

*Included in Registration SuperPass (Option A) or Registration Option C*

**ASE Joint Panel: Tools for the Surgical Educator**

Chair: John Paige, MD | Co-Chair: Kent Van Sickle, MD

**SESSION DESCRIPTION**

This session will review both established and innovative strategies and approaches for teaching surgical knowledge, skills, and attitudes to learners and trainees. It will include discussions related to curriculum development, assessment, and technology. This session is intended for those individuals involved in surgical education, from fellowship/program/clerkship directors to clinical faculty.

**SESSION OBJECTIVES**

At the conclusion of this session, participants will be able to:

- Integrate assessment tools with evidence of validity and reliability into the evaluation of technical and nontechnical skills
- Compare and contrast the advantages and disadvantages of various proficiency-driven curricula for surgical education
- Incorporate technology into surgical education in new and innovative ways

SAGES Mini–Medical School Boot Camp for HS Students
Chair: James Rosser Jr, MD | Co-Chair: Vadim Sherman, MD
High School Rep/ Top Gun for Kids: Harris Alam

**SAGES does not offer CME for this event**

Building on success of previous years, high school students from the Houston area and SAGES membership will have the opportunity to experience the wonderful world of medicine and minimally invasive surgery. With projected physician and surgeon shortages in the future, the vision of this program is to encourage and promote early decisions to join our noble profession. The day is power packed with expanded hands-on skill lab, and the Top Gun Interactive Experience. Both cognitive and skill competitions with awards and prizes will be offered. So do not delay in contacting SAGES for more information because space is limited.

The SAGES Mini Med School is designed to expose high school students to the field of Surgery through hands-on experience and simulation. Students will begin to appreciate that being in the OR is rewarding, important work, and fun. To maximize exposure, real life surgeons/volunteers will mentor the students throughout the program.

The Mini Med School Experience is a power packed extravaganza that provides fun with a purpose. Students will have the opportunity to show that they have the “right stuff” to join the ranks of physicians and laparoscopic surgeons. From video games that help decrease errors, to robots, FLS and Top Gun surgical simulation drills. Make sure you do not miss this one of its kind opportunity.

Program limited to 100 high school students. Letter of recommendation from a high school teacher is required.
1. Top Gun
Coordinator: James “Butch” Rosser, MD
The Top Gun Laparoscopic Skill Shootout Station will allow participants of all training levels to develop and improve their laparoscopic skills. The station will feature the validated “Rosser TOP GUN” skill development stations developed by Dr. Rosser and made famous at Yale. To date, over 6000 surgeons have participated around the world. Instructors will show tactics and techniques that will transfer readily into the clinical environment. Participants will compete for slots in the Top Gun Shoot Out; crowning one SAGES 2017 TOP GUN.
Objectives:
• Review the Rosser suturing algorithm
• Perform dexterity skills and suturing exercises using the “Rosser TOP GUN” training stations
• Compete with other surgeons in the Top Gun Shoot Out

2. Robotic Surgery Mini-Olympics
Coordinator: Omar Yusef Kudsi, MD, MBA
Robotic Surgery Mini-Olympics offers an opportunity for participants to familiarize themselves with the da Vinci robot console and simulator. Participants will learn basic robotic surgery techniques and practice those skills on various simulator tasks. In addition, participants will have the option of recording their performance as part of a friendly skills competition.
Objectives:
• Gain familiarity with the basic daVinci robot console and controls
• Practice various robot skills on the simulator
• Identify basic differences between robotic and laparoscopic surgical approaches

3. Fundamentals of Laparoscopic Surgery™
Coordinator: Salvatore Docimo, DO, MS
Fundamentals of Laparoscopic Surgery™ is a joint program of SAGES and ACS, it is now required for board certification of general surgery residents. The program is designed to teach physiology, fundamental knowledge, and technical skills, required for competency in laparoscopic surgery. This station will introduce participants to the FLS technical tasks.
Objectives:
• Describe the components of the FLS 2.0 program
• Explain the preoperative, intraoperative, and postoperative considerations fundamental to laparoscopic surgery
• Have exposure to the technical tasks involved

4. Fundamental Use of Surgical Energy™/ Virtual Electrosurgical Skill Trainer
Coordinator: Emilie Fitzpatrick, MD and Brian Nguyen, MD
SAGES has developed a curriculum to help with the understanding and safe use of energy devices in the operating room. This learning station will allow the user to review the science and safety behind monopolar, bipolar and ultrasonic energy devices. Participants will have the opportunity to use the VEST simulator. The VEST simulator will introduce learners to the basic electrosurgical tasks in surgery within a high fidelity virtual reality environment using both monopolar and bipolar electrosurgical tools.
Objectives:
• Describe the physics behind common energy devices in the operating room
• Appreciate the difficulties related to the use of the electrosurgical tools.
• Learn the proper technique in performing electrosurgical tasks safely
• Perform different energy-based tasks within a simulated scenario using both monopolar and bipolar electrosurgical tools

5. Fundamentals of Endoscopic Surgery™
Coordinator: Jonathan Pearl, MD
Flexible Endoscopy continues to be an important component to a General Surgeons practice. Endoscopy requirements in residency training have increased over the past few years and simulation is now a requirement. This station will showcase the newly developed Flexible Endoscopy training models. These models allow training in scope navigation, tissue targeting, retroflexion and loop reduction.
Objectives:
• Practice valuable endoscopic skills in a reproducible model
• Perform various endoscopic tasks in a virtual reality simulator
• Evaluate the SAGES endoscopic curriculum
6. Laparoscopic Common Bile Duct Exploration
Coordinator: Byron Fernando Santos, MD
Laparoscopic common bile duct exploration is a surgical technique that allows the common bile duct to be cleared of biliary stones without the need for open or endoscopic procedures. At this station participants will learn the available techniques used for laparoscopic bile duct exploration.

Objectives:
- Practice the techniques available for cannulating the common bile duct
- Practice various techniques for clearing the common bile duct of stones
- Interpret intraop cholangiogram to identify obstructing stones

7. SMART Enhanced Recovery After Surgery
Coordinator: Deborah Keller, MS, MD
A multimedia station of web, video, and printed materials manned by a SMART committee member to discuss the program, resources available, and raise awareness of SMART and penetrance of enhanced recovery. A video screen will play loops of minimally invasive gastrointestinal procedures, presentations from committee members on enhanced recovery topics, and instructional videos on components of multimodal enhanced recovery, to draw members in and add additional educational content. Printed copies of existing pathways, patient education material and the SAGES/ERAS Society manual on enhanced recovery for GI surgery will be available as take-home materials for the content in the learning center.

Objectives:
- Raise awareness of SMART program among meeting attendees
- Increase knowledge and utilization of the SAGES web resources available for members
- Spotlight and increase use of the SAGES/ERAS Society Manual on enhanced recovery for GI surgery
- Increase adoption of enhanced recovery principles
- Assist members in translating knowledge of enhanced recovery into clinical practice across the preoperative, intraoperative, and postoperative periods
- Provide troubleshooting to members from SMART material for obstacles encountered during development and implementation of enhanced recovery principles

8. Advanced Laparoscopic Suturing of Anastomoses
Coordinator: Julian Varas, MD
The ALSA station allows the participants to acquire advanced laparoscopic suturing skills to perform permeable and leak-free anastomosis of different sizes and positions. Participants will practice on validated real-tissue simulation models in high definition endotainers. The main goal is to learn how to safely perform hand-sewn and mechanical small bowel anastomosis and the principles to perform small duct-to-mucosa anastomosis. Instructors will give tips and feedback and also an iOS App with video tutorials will guide participants through the training. Each exercise has a time goal and all anastomoses performed are tested for permeability and leakage.

Objectives:
- Understand the principles of laparoscopic anastomosis in different sizes and positions
- Perform various laparoscopic anastomoses in real-tissue simulation models inside an HD endotrainer (jejuno-jejunostomy, hepatico-jejunostomy and pancreatico-jejunostomy)
- Practice laparoscopic intracorporeal suturing with 3-0, 4-0 and 6-0 needles

9. Telestration-Guided Laparoscopic Visual Skills Practice
Coordinator: Helena Mentis, PhD
The demonstrated telestration system allows mentors to provide reference and annotation on the real-time laparoscopic video. For this Learning Center activity, participants will practice a low-fi laparoscopic skill on physical boxes with the guidance of a mentor. The goal is for the participant to learn to identify an exact task target as well as visually learn the steps to accomplish the task. Throughout the task, the mentor will provide verbal instructions and telestrations on the video display.

Objectives:
- Practice the laparoscopic visual skills with the guidance of mentors
- Identify efficient ways in accomplishing the tasks
- Adopt expert gaze patterns in performing the tasks
- Develop communication skills with a mentor
Call for Abstracts

SUBMISSION DEADLINE: January 4, 2017

All abstracts for this session MUST BE SUBMITTED ONLINE.

Please visit http://www.sages.org/meetings/abstracts for instructions.

You are invited to submit papers to the “Emerging Technology” session to be held during the 2017 SAGES Annual Meeting. The meeting will be held March 22-25 in Houston, TX.

This category of abstract is open to physicians and industry engineers / scientists / researchers. It should be used for reporting on cutting edge or emerging technologies for which formal experimental data may not yet be available. Developers and inventors are encouraged to present their own work.

IF YOU ARE PLANNING TO SUBMIT OR DISCUSS ANY IDEAS OR INVENTIONS, before you submit or discuss them, please keep in mind that discussing or displaying them at this meeting may be considered a public disclosure of the idea or invention, which can negatively affect your right to protect that idea or invention. You may also have duties to your employer relating to that idea or invention, and should discuss the impact of a disclosure with the proper representatives of your employer before you submit or discuss it.

Abstracts will be accepted until January 4, 2017 and will undergo an expedited review process. This session is appropriate for technologies that may still be under development. Since the Emerging Technology session will not include CME credit, topics are not limited to formal studies or experiments but may include description based abstracts or very preliminary results. Presentations will be 5 to 10 minutes in length. Accepted abstracts will be published in the official SAGES Final Program to be distributed onsite.

Submissions should follow the following format:

1. Objective of the technology or device
2. Description of the technology and method of its use or application
3. Preliminary results if available

All abstracts for this session MUST BE SUBMITTED ONLINE. Please visit http://www.sages.org/meetings/abstracts for instructions.

If you have any questions, please contact the SAGES office at 310-437-0544 • FAX: 310-437-0585 or email: abstracts@sages.org.

Sincerely,

Kevin E. Wasco, MD – 2017 Emerging Technology Chair
Ozanan Ricardo de Oliveira Meireles, MD – 2017 Emerging Technology Co-Chair
Did you know that the American Board of Surgery requires 60 Category 1 CME Credits from a self assessment activity every 3 years for Maintenance of Certification (MOC)?

Get your self assessment credit from SAGES today:

- SAGES Annual Meeting (www.sages2017.org)
- Fundamentals of Laparoscopic Surgery™ (http://www.flsprogram.org/)
- Fundamentals of Endoscopic Surgery (http://www.fesprogram.org/)
- Fundamental Use of Surgical Energy™ (http://www.fuseprogram.org/)
Join now and enjoy the following benefits:

› Over 31 hours of Category 1 CME Credit including self-assessment CME credits for MOC
› Substantial discount for registration to SAGES Annual Meeting
› Cutting-edge education and professional development
› A network of 6000 colleagues and surgical endoscopic experts
› State of the art surgical technology and techniques
› Subscription to “Surgical Endoscopy”
› Member-only research grants and career development awards
› Leadership opportunities through 37 committees and task forces
› ... and so much more!

Join SAGES today to save up to $250 on registration fees for SAGES 2017.
Visit www.sages.org/membership to learn more!

SAGES Mission
Improve quality patient care through education, research, innovation and leadership, principally in gastrointestinal and endoscopic surgery.

TRAINING AND TECHNOLOGY

SAGES Fundamentals:
Revolutionizing Surgical Training Worldwide.
Help SAGES Help You!

Ensure Patients Find You in the “Find a Surgeon” Directory!
Update Your SAGES Profile in Just 5 Minutes!

Take 5 minutes today to update your SAGES profile so patients can find you in our “Find a Surgeon” directory. You can simply use your handheld device or your desktop or call our membership office at 310-437-0544, ext. 110, and we can walk you through it.

1. Go to www.sages.org/login/ and login.
2. Click My Profile from the Members Menu.
3. Click Profile and then Edit.
4. Select the tab “Primary Practice/Public Information” and enter the details. If you have any additional practice information, you can enter that information in the “Secondary Practice/Public Information” tab.
5. Make sure to scroll down to the “Surgical Specialties” section and check off all that apply so your profile will appear when patients search by specialty.
6. Finally, please include an updated photo by clicking “Change Profile Photo” at the very top of the page.
7. When you are finished, visit www.healthysooner.org and click the “Find a Surgeon” tab on the menu to see how it all works!

It is critical that you update as much information as possible. We thank you in advance for your participation!

Thank you to those SAGES members who annually contribute to the SAGES Research & Education Foundation. The SAGES Foundation could not carry out its mission without the contributions of the dedicated members of SAGES. Your past and future investment towards great projects of surgical education and research is both valued and appreciated. This past year, the SAGES Foundation was able to distribute $508,000 in grants.

Why should YOU support the 80 by 20 Campaign?

The goal of the campaign is to have 80% of SAGES members giving to the Foundation by the year 2020. Did you know:

- The Foundation supports the amazing ground-breaking work that SAGES does: Seed money for FLS, FES, FUSE, research grants, Career Development Award, Go Global, Brandeis Scholarship, Flexible Endoscopy Fellows courses & Resident courses.
- SAGES matches member contributions.
- For every $1.00 SAGES has given to the Foundation, the Foundation gives $1.50 back to SAGES projects and programs.

Are You a Part of the 80%?

Visit www.sagesfoundation.org and help us sustain the advancements in care, research and education that SAGES is known for.

All donations to the Foundation are tax-deductible (to the extent permitted by law). Every donation, no matter the amount, counts toward the 80 by 20 Campaign.

SAGES 2017 Surgical Spring Week

69
**Hotels / Registration / Travel Info**

**Hotel Reservations**
Please book your hotel rooms within the SAGES Hotel Block!
There are 3 hotels to choose from when booking accommodations.
The quickest and easiest way to reserve a hotel room for SAGES is on-line at http://www.sages2017.org/travel-information/hotel/. If you require additional assistance, please email registration@sages.org or call 310-437-0544 x128

**Reservations Prior to the Deadline:**
Book your room early at http://www.sages2017.org/travel-information/hotel/. Rooms are available on a first-come, first-serve basis!

**Reservations After the Housing Deadline:**
Rooms and rates are not guaranteed and are subject to availability. See our online housing page for latest info.

**Shuttles:**
Shuttle service will be provided from the hotels to social events not within walking distance.

---

**SAGES Social Programs**

**International “SING-OFF” Entry Instructions**
1) Due to limited time, you ABSOLUTELY MUST sign up in advance to participate. Acts will not be added on-site.
2) Only musical acts are welcome this year (no video).
3) All acts are limited to one song or presentation, not to exceed 5 minutes. The MC has been given “pull the plug” privilege, and will adhere strictly to this time restriction.
4) Keep in mind that the Sing-Off is in the name of fun. Serious musicians need not apply!
5) Please rehearse your act in advance. You will be performing for about 1,000 of your colleagues!
6) When you register, you must include the name of your group, names of participants (aliases are acceptable), name of your act or song, and city or institution. These will be published in the program. Please contact Sallie Matthews at the SAGES office (sallie@sages.org) no later than February 13, 2017 to participate.
7) All acts must provide a back-up MP3 at least 2 weeks prior to the event, or notification if live instruments will be used.
8) This event is open to all SAGES registrants and exhibitors.

---

**Welcome Reception - in the Exhibit Hall!**
Date: Wednesday, March 22, 2017

---

**Ways to Book Your Hotel Room:**
All attendees are responsible for their own hotel reservation.
- Book online at: http://www.sages2017.org/travel-information/hotel/
- Call our housing coordinator, Rose Moreno at toll free ph 888-508-5731 or local ph 713-853-8950
- Further assistance: contact SAGES Registrar email registration@sages.org or call 1-310-437-0544 x128

---

**Housing Deadline:**
February 12, 2017

---

**Hotels / Registration / Travel Info**

---
1. Hilton Americas-Houston  
2. Marriott Marquis Houston  
3. Embassy Suites Houston Downtown

**Hotels**

1. **Hilton Americas – Houston**  
   **SAGES Headquarters Hotel**  
   **1600 Lamar Street, Houston, TX 77010**  
   Conveniently located in the heart of downtown Houston, Hilton Americas-Houston is connected to the George R. Brown Convention Center via two indoor skywalks. It is just steps away from a range of attractions such as Discovery Green Park, Toyota Center, BBVA Compass Stadium and Minute Maid Park. GreenStreet premier dining and entertainment center is also close by. This AAA Four-diamond hotel offers spacious guest rooms, WiFi access (fees apply), full-sized work desks and ergonomic chairs. Hilton Americas-Houston has a range of dining options. 1600 Bar + Grille features delicious locally-sources seasonal fresh produce, certified Angus Beef and Gulf seafood for breakfast, lunch and dinner. The Lobby Lounge is the perfect setting for meeting friends or business associates, offering cocktails, beers and an extensive wine list.

2. **Marriott Marquis Houston**  
   **1777 Walker Street, Houston, TX 77010**  
   Soar to new heights at Marriott Marquis Houston. The sleek new centerpiece of the Houston skyline, it is the premium choice in downtown. Capturing the bold spirit of Texas, this new hotel boasts 1,000 rooms and over 100,000 sq. ft. of meeting space, including Houston’s largest ballroom. Enjoy quick access to George R. Brown Convention Center via the skybridge and a location convenient to popular attractions like Minute Maid Park, Toyota Center and BBVA Compass Stadium in the nearby entertainment districts.

3. **Embassy Suites Houston Downtown**  
   **1515 Dallas Street, Houston, TX 77010**  
   Rate includes complimentary cooked-to-order breakfast and complimentary Evening Reception  
   A high-rise hotel overlooking Discovery Green Park, the Embassy Suites Houston Downtown is only steps away from the Houston Center Business District, the George R. Brown Convention Center, Houston Astros Minute Maid Park, Houston Rockets Toyota Center, Houston Dynamo BBVA Compass Stadium, GreenStreet Entertainment Complex and the Park Shops at Houston Center. Each suite has a sofa bed, dining/work table, microwave, coffeemaker, mini-refrigerator, two flat-screen HDTVs, an alarm/clock radio with MP3 connection, two phones with data ports and Wi-Fi access.
NEVER STOP LEARNING...

The SAGES University Masters Program will help further your professional development in eight curriculum pathways which progress from Competency, to Proficiency, to Mastery.

Attend the Masters Series Courses at SAGES 2017 to get started.

www.sages.org/masters-program
