RECOMMENDATIONS –

- Avoid the use of non-standard abbreviations. Too many abbreviations, especially non-standard ones, make the abstract difficult to follow.
- Consider displaying the data in table form. This often improves the clarity of the abstracts and can save space.
- Be certain that the number of experiments performed is sufficient to statistically justify the conclusions.
- English is the official language of SAGES. All abstracts and manuscripts should be carefully proofread.

ABSTRACT BODY SECTIONS:

Your abstract should have the following sections (except for case reports and similar submissions):

INTRODUCTION – The first sentence(s) must state the hypothesis, purpose, or specific objective of the study.

METHODS AND PROCEDURES – Describe the study design, subjects and evaluative procedures briefly. Clear documentation of statistical methodology should accompany the methods/results section.

RESULTS – A summary of the results must support the final conclusions and be stated in the abstract. Do not include statements about providing further data or conclusions at the time the manuscript is presented. (e.g. "results and recommendations will be presented" etc.)

CONCLUSION(S) – The abstract should close with a brief statement of the conclusion(s). All data presented must confirm, refute or modify the purpose of the specific objectives of the study as stated in the introductory sentence.

PUBLICATION AND COMPLETE MANUSCRIPT – All Accepted ORAL Abstract Presenters MUST submit a complete manuscript to *Surgical Endoscopy*.

By accepting our invitation to present, you are agreeing to submit a complete manuscript to the journal ***Surgical Endoscopy*** for consideration.
