

April 12, 2020

Dear Valued Customer,

Symmetry Surgical, Inc. is a leading provider of electrosurgery and smoke evacuation solutions. These solutions are marketed to hospitals and healthcare facilities throughout the U.S. and globally, under such brand names as Bovie® and Olsen®. Several societies, including the Society of American Gastrointestinal Endoscopic Surgeons (SAGES), recently published recommendations supporting the use of smoke evacuation to filter CO2 gas or smoke created during open, laparoscopic, and endoscopic procedures.

Symmetry Surgical's smoke evacuation portfolio includes the Bovie® Smoke Shark™ Surgical Smoke Evacuator and related accessories. The Smoke Shark™ II provides 25CFM of evacuation, with a 35-hour, 4-stage ULPA filter. The filter is efficient in trapping 99.999% of particles and microorganisms 0.1 – 0.2microns in size. The Ultra-quiet, Bovie® Smoke Shark™ II is a compact unit designed to fit in any OR and is compatible with most electrosurgical units and devices.

Bovie® Smoke Evacuation Solutions

| Name | Description |
